ANDALUSIA HIKING GUIDE

JUNTA DE ANDALUCÍA
CONSEJERÍA DE TURISMO Y DEPORTE

TABLE OF CONTENTS

Introduction	4-11
How to use this guide?	4-5
Equipment	8-9
Tips and warnings	10-11
Andalusia on foot	12-49
Andalusia, never-ending tracks	14-17
Almería, the most beautiful setting	18-21
Cádiz, a natural mosaic	22-25
Córdoba, queen of the pastures	26-29
Granada, stones giants	30-33
Huelva, light and water	34-37
Jaén, the green fortress	38-41
Málaga, coastal mountains	42-45
Seville, marshland and meadows	46-49
The bests routes...	50-101
With a view	50-55
For the restless	56-61
With family	62-67
In summer	68-73
Full of history	74-79
With a surprise factor	80-85
With fauna	86-91
Montain routes	92-97
Adapted	98-101
Long distances routes	102-133
The 'Camino de Santiago'	106-109
GR 7. The andalusian trail	110-113
GR 240. Sulayr	114-117
GR 144. The route of transhumance	118-121
GR 147. 'Sierra Profunda'	122-125
GR 249. The 'Gran Senda de Málaga'	126-129
GR 247. 'Bosques del Sur'	130 -133

Hiking though the Natural Parks	134-233
Terms of use	136-137
Doñana	138-141
Sierra Nevada	142-145
Cabo de Gata-Níjar	146-149
Sierra María-Los Vélez	150-153
Bahía de Cádiz	154-157
La Breña y Marismas de Barbate	158-161
Del Estrecho	162-165
Los Alcornocales	166-169
Grazalema	170-173
Sierras Subbéticas	174-177
Sierra de Hornachuelos	178-181
Sierras de Cardeña y Montoro	182-185
Sierra de Baza	186-189
Sierra de Castril	190-193
Sierra de Huétor	194-197
Sierras de Tejeda, Almijara y Alhama	198-201

Cádiz	242-247
Córdoba	248-253
Granada	254-259
Huelva	260-265
Jaén	266-271
Málaga	272-277
Seville	278-283
Useful information	284-305
Maps list and credits	306-311

MAPS

There are different types of maps according to the type of representation: large areas (provinces, natural parks...), stages or details of the routes. Each has a different treatment to improve their reading.

PROFILES

Altimetry profiles, in addition to the differences in height, show interest aspects of the journey, the difficulty or length in each section or stage.

QR CODES

The guide is completed with related information ((data, profiles, routes, maps...) that can be downloaded in PDF by QR codes.

SYMBOLS

All symbols follow the Manual Signaling Public Use of the Andalusian on his behalf :

	Information Point		Lookout		Fish farm
	Visitor center		Botanical Garden		Nursery Garden
	Documentation center		Park wildlife		Natural spring birth
	Observatory for public use		Visits with monitor		Archaeological remains
	Observatory scientific use		Office of the Nature reserve		Ethnographic site
	Recreational area		Restoration		Dam
	Refuge		Visit caves		Beach
	Hotel		Speleology		Plant species of interest
	Marked trail		Swimming		Cortijo
	Cycling lane		Diving		Bridge
	Equestrian route		Fishing		Parking
	Shoreline route		Water activities		Ladders
	Sale of products and services		Air activities		Tower
	Sale of publications		Climbing		Bench
	Nature Classroom		Hydrotherapy		Ermitage
	Sea classroom		Hunting		Footbridge
	Ecomuseum		Cave / Sima		Ford
	Camping		Panoramic view		Natural monument
	Organized camping area		Fountain		Architectural element
	Hostel				

SECTIONS

The guide is divided into six sections identifiable by the color of all elements, which refer to different types of routes and interesting content.

■ ANDALUSIA ON FOOT

Basic information about the Andalusian provinces and the routes that we can find.

Most significant information

QR codes to download information on mobile devices

Additional information

Wide selection of images

■ THE BEST ROUTES...

Selection of the best trails in Andalusia in terms of its various users: from mountain trails harder to tours to do with a family.

Figures for international protection

■ DO NOT FORGET...

No visit to Andalusia is complete without a visit to its people, its culture and gastronomy. Tips to finish the path with a different experience.

Tips

Indication of the page related route

Equipment

According to the Meteorology, each path requires specific equipment for making safe and pleasant way. The basic thing is common sense. Plus:

- 1 In just one day routes just carry a backpack of 10 and 20 liter, waterproof better.
- 2 The backpack must always be glued to the back.
- 3 Clothing should fit the weather, especially in terms of cold and rain.
- 4 If it's hot, a hat, breathable clothing, sunglasses and sunscreen.
- 5 It is important to bring trekking shoes.
- 6 A map of the route may be more than useful for making decisions.
- 7 Binoculars and camera.
- 8 First aid kit should include antipyretic and anti-inflammatory and an antiseptic liquid (alcohol, hydrogen peroxide or iodine).
- 9 The trekking poles reduce third leg effort, reduce injuries and allow a full year.
- 10 This guide allows downloading of brochures containing detailed information of each route can be found on the phone and no need for access to a data network.

Tips and warnings

- Choose a suitable route to the physical condition of the group.
- It is better to respect the layout of the routes. A shortcut without guarantees may endanger your safety or astray.
- Enjoy the silence and do not disturb. Listen to the music of nature.
- Inform someone of the route you want to go.
- Calculate the time it will take to walk the route and avoid the dark.
- Read some information or visit the visitor center to better understand what you will see.
- A sufficient rate is 4 kilometers per hour.
- Calculate your rate based on the total distance you have planned to do.
- Bring water and some food.
- Be cautious.
- If you walk with children, always adapt yourself to their conditions.
- Local people are often generous and interesting source of information.
Coexists with nature and with them.

Discovering the eight provinces
of Andalusia and its immense
protected natural heritage. We are
ready to start walking.

Andalusia on foot

ANDALUSIA

Never-ending tracks

Information about culture,
town festivals, gastronomy
and places of interest.

1. Andalusian route.
2. River in Grazalema.

3. Hikers in Sierra Nevada.

More information:

<http://www.andalucia.org>
<http://www.ventanadelvisitante.es>

Andalusia's network of public tracks offers visitors a whole host of routes to discover the Autonomous Community's endless landscapes. These may be challenging, family-friendly and offer the possibility of enjoying the snow or the beach, moving dunes, ancient prehistoric sanctuaries, white-washed villages or bashful animals.

Above all, the routes of Andalusia will reward travellers with a whole host of experiences. Hikers will discover the extraordinary biodiversity of the region with the richest fauna and flora of the continent. They will also come across samples of the region's history, through castles or gold-washing sites, artificial snow pits or bread-making ovens. But they will also have the chance to marvel at the culture amassed over thousands of years in this ancient territory. Finally, they will come across the best: its people; it is a region of mixed cultures after the comings and

goings of people from three continents, but the locals will go out of their way to make sure your experience of Andalusia is unforgettable.

ALMERIA

The most beatiful setting

Information about culture,
town festivals, gastronomy
and places of interest

Towns	102	Natural Parks	3
World Heritage	1	Protected surface	239,000 ha
Protected Areas	18	Routes	32
Biosphere Reserves	2	Ramsar Wetlands	3

1

1. A large holm oak with Sierra de María in the background.

Scuba diving in Cabo de Gata.

2. The Tabernas

Desert. 3. Scuba diving in Cabo de Gata.

4. The Monsul wave.

Water determines life and landscapes, however it goes beyond this Almeria, here it is the a symbol of its culture. The rocky summits of the natural parks of Sierra Nevada and Sierra María-Los Velez are covered in snow every winter.

In the Cabo de Gata Natural Park, a shortage of rain has made it the European sub-desert par excellence. It also has virgin coastlines and seabeds that are highly sought after by scuba divers from all over Spain. Almeria offers us the pureness of having been a corner of Europe that was practically unknown until very recently. Its ancient culture, revealed in the prehistoric caves, is accessible thanks to these routes.

2

The southernmost point of Europe can be summarised in one word: beauty. Diverse beauty. The great Mediterranean forest, Los Alcornocales is the neighbour of the Grazalema natural park, famous for its ravines and caves and as rugged as it is lush. Almost touching Africa is the natural park of the Strait, the kingdom of wind, of unique plant species, of the bustle of the migration of birds between two continents, like no other in the world. Or the calmer beauty of the Bahía de Cádiz Natural Park and Doñana; wetlands located exactly where the sunset is at its most beautiful. All of this in a province fully equipped to cater for visitors and offering a magnificent gastronomic experience, particularly with its wines, which are enjoyed the world over accompanied by the beat of the music from Jerez.

1. Reservoir in Cadiz.
2. The Spanish Fir in Grazalema.
3. Fishing.
4. The cork culture in Los Alcornocales

CORDOBA

Queen of the pastures

Information about culture,
town festivals, gastronomy
and places of interest

1

Towns	75	Protected surface	169.000 ha
Protected Areas	20	Routes	27
Biosphere Reserves	1	Ramsar Wetlands	5
Natural Parks	3		

1. The vast grazing lands of Cordoba.

2. The fruit of the holm oak.
The Dehesas de Sierra Morena Biosphere Reserve is the jewel of Cordoba in the Natural Park of Hornachuelos, an emblematic area where man and nature live in harmony. Lands of the clear forest, pastureland with holm oaks and cork oaks. Rivers flow in Hornachuelos as granite balls do in Cardeña, huge round stones scattered across the pasturelands.

3. Los Pedroches in bloom.

4. Hiking in the Subbeticas.
Lands of the clear forest, pastureland with holm oaks and cork oaks. Rivers flow in Hornachuelos as granite balls do in Cardeña, huge round stones scattered across the pasturelands.

Water emerges in the Sub-Baetic System. This huge karst region is full of water, with countless springs and, of course, chams, such as that of Cabra, which is extremely popular among pot-holing enthusiasts and caves including the emblematic and visitable bat cave. And all of this is intensified by countless villages in which one can choose from Moorish influences or Baroque beauty.

GRANADA

Stone giants

Information about culture,
town festivals, gastronomy
and places of interest

Towns	169	Natural Parks	5
World Heritage	2	Protected surface	297,000 ha
Protected Areas	17	Routes	49
Biosphere Reserves	1	Ramsar Wetlands	1

2

1

1. Granada and its unforgettable views.

2. Costa Tropical.

3. Hiking in the Altas Cumbres.

4. Alpujarras.

The giant stones of Sierra Nevada were watching over the first Andalusia in its most distant geological past. These huge masses, full of water, a wealth of plant life and history in the Alpujarras are sure to leave an impression on visitors. Masses that make the Huétor natural park seem small. This is a very nice area to visit, with its gentle landscape, where the source of the Darro River is located, with an abundance of trout and where the Moorish past is still evident in the old villages. But there is so much more to Granada. Hidden in Baza is a mining past and a glorious autumn that is full of life. The beauty of Castril centres around its magnificent river; a beautiful setting made up of forests and canyons; Tejeda, Almijara y Alhama provide

3

4

us with a wonderful surprise, with waterfalls, the Pinus nigra subsp. laricio and the taxus along with a group of Moorish and Nasrid villages.

HUELVA

Light and water

Information about culture,
town festivals, gastronomy
and places of interest

Towns	79	Natural Parks	2
World Heritage	1	Protected surface	340,000 ha
Protected Areas	23	Routes	45
Biosphere Reserves	2	Ramsar Wetlands	3

1. Almonaster, a mountain village of Huelva.

2. Unique colours of the Rio Tinto river.

3. Bird life.

4. Dunes.

5. El Rocio.

In the south, the sun glistens off the still waters. In the north, we will find the humid Atlantic forest, one of the雨iest areas in Spain. Huelva offers a collection of samples, a natural area full of possibilities and routes to delve into nature and culture. Sierra de Aracena y Picos de Aroche is a border and castle territory, with thousands of rivers and chestnut forests, stone walls and immaculate villages. A beautiful forest that is a haven for hikers. To the south, Doñana and Marismas del Odiel are home to hundreds of bird species, marshes and pike, lynx and eagles. Along with a virgin coast that covers dozens of kilometres, where light is the protagonist. All that Huelva has to offer is good and its gastronomy will corroborate this.

JAESEN

The green fortress

Towns	97	Protected surface	317.000 ha
Protected Areas	17	Routes	43
Biosphere Reserves	1	Ramsar Wetlands	3
Natural Parks	3		

Jaen has two huge jewels along with other smaller ones. Cazorla, Segura y Las Villas is colossal. The largest park in Spain, shrouded by rivers and pine forests, travellers can enjoy its splendid villages, exclusive fauna and all sorts of active tourism activities. Andujar, another vast natural empire is home to three of the most emblematic species of the Mediterranean mountain region: The lynx, the Spanish imperial eagle and the wolf. In the Despeñaperros park, the stone gorges accommodate them, while in Sierra Magina, amid a sea of olive groves, the diverse landscapes have hardly changed, adding to the medieval ambience of its villages.

3

Nature is present from one end of the mountainous province to the other. To the west, the misty mountains, the true Mediterranean jungle of Alcornocales, a neighbour of the Grazalema Park, which reveals a more rugged and beautiful side of Malaga, full of cavities and vegetation.

Information
www.malaga.es/turismo

1. **Nerja.**
 2. **Desfiladero de los Gaitanes.**
 3. **Costa del Sol.**
 4. **Ronda**
- Malaga's treasure is located in the future national park of Sierra de las Nieves. Here the white of the limestone contrasts with the plutonic red peridotite rocks. Although hikers will be looking out for the Spanish fir forests, the Tertiary forests and the beautiful Moorish influence on its villages and its gastronomy. The same influence is visible in Tejeda, Almijara and Alhama, part of the Axarquia region. The best views of the Mediterranean can be enjoyed from the viewpoints located in the pine forests of the Montes de Malaga, so close to the city.

2

3

The two natural parks of Seville are worthy of their Biosphere Reserve designation. Areas, therefore, in which a perfect symbiosis has been achieved between Man and nature.

The Sierra Norte offers fine examples of pasture land, riparian forests along the Huesna River, patches of oak trees and unique features such as the Cerro del Hierro, an old Roman mine that is now a geological monument. Doñana in Seville is an idyllic setting with a constant flow of wetlands providing habitat for pike and hundreds of bird species. Infinite plains where travellers can find themselves. The Dehesa de Abajo and Brazo del Este are located on the edge of Doñana, close to the city, making them ideal places for a quick getaway to enjoy nature.

Discover 8 unique routes
offering endless views at
some point along the way.

The best routes... WITH A VIEW

MESA ROLDAN

Cabo de Gata-Níjar N.P.

Between Carboneras and Agua Amarga lie these volcanic rocks that offer striking views of the park's coastline. Situated approximately 100 m above the typical sparse vegetation of the area including the Mediterranean dwarf palm and esparto grass; a lighthouse and a tower on its summit and the best panoramic views of the sea.

DEL AGUADERO

Sierra Nevada N.P.

A wide variety of landscapes and vestiges of human activity – threshing floors, irrigation canals, country estates – greet visitors along this route in Almería. From shady ravines lead us to vantage points where we can admire the wonderful Andarax River valley. We travel through pine forests, riparian forests and we will even come across a plant that is endemic to Andalusia, the silver broom.

ALGARBES-BETIJUELO

Del Estrecho N.P.

The town of Punta Paloma (Tarifa) sees the start of a new route that will take us 300 m above sea level to admire the Atlantic and the magnificent pine forest that runs down to the coastline. We can see the famous sand dunes of Valdevaquerinos, Bolonia and Gibraltar. The necropolis is the most important site in the province.

CERRO DE SAN CRISTOBAL

Sierra de Aracena y Picos de Aroche N.P.

Mid-mountain route begins in Almonaster where we can enjoy the varied landscapes of the area: pastureland, woodland, riverbanks and chestnut groves. Equally beautiful is the human aspect of the landscape, with stone-walled paths or water mills. Accompanied by the chirping of the birds and once we have crossed a stream, we will reach 900 m above sea level. Even the Huelva estuary can be seen...

LOS CASTAÑARES

Sierra Norte N.P.

The route begins at the end of the Paseo de La Alameda, amid the shade of the elm trees and the hackberries and along paths lined with chestnut trees, also with gall oaks and holm oaks. A beautiful and pleasant road, that rewards us half way along with magnificent views and the monumental urban centre of Constantina at the end.

TORCAL ALTO

Torcal de Antequera N.S.

The route begins in the carpark of the Visitor's Centre and it is perfect for quickly reaching the unusual landscape of this limestone town, formed 150 million years ago beneath the sea. Along the route we will come across the Mirador de Las Ventanillas, offering panoramic views of Villanueva and the Campanillas River valley.

ALBANCHEZ CASTLE

Sierra Magina N.P.

After wandering through Albánchez, we come to the short but intense ascent up a steep staircase to the historic castle. From the top, the views of the natural park are exceptional. From here we can see the peaks of Magina, the Serrezuela de Bedmar and the Sierras de Cazorla. To the north, the olive groves of Ubeda and Baeza and just emerging, the sandstone summit of El Torcal.

DEL AGUILA

Sierra de Hornachuelos N.P.

The route begins close to the Huerta del Rey visitor's centre, 1.3 km for Hornachuelos. This is where we will find the lapiaz, sharp pointed rocks also known as badlands. We will reach a viewpoint that overlooks the Guadalora River valley, with a dense gallery forest where we can hear the birds, hidden in alder trees, willows and ash trees.

Medium and long routes to
discover Andalusia at leisure.

The best routes... FOR THE RESTLESS

SIERRA LARGA

Sierra María-Los Vélez N.P.

The diverse landscapes will be our greatest reward. Shady spots and sunny spots, outcrops, mountain passes and hills, ravines and river banks, the flat, wide open valleys before us, the shapes created by the erosion of the limestone rocks... all of this in a considerably high area blanketed by foliage.

EL RUMBLAR

Sierra de Andújar N.P.

The route begins at the Rumblar Dam (Baños de la Encina), amid a forest of holm oaks and takes us through olive groves with wild cattle and deer. It takes us through the large country properties of La Nava de Andújar before entering a more abrupt territory to then reach the end where we will unexpectedly discover the mining remains of Los Escoriales.

CARDEÑA-ALDEA DEL CEREZO

Sierra de Cardeña y Montoro N.P.

A track begins at the Cardeña's Plaza de la Independencia square and heads for the pastureland. Cows, sheep and pigs bear witness to human activity and to the excellent local cuisine. A variety of bird species can be spotted at the small reservoir of Tejoneras. The route takes us past the old uraninite mine of El Cano, to end at the small village of Cerezo.

FÉLIX RODRÍGUEZ DE LA FUENTE

SS. de Cazorla, Segura y Las Villas N.P.

A very popular route given the beauty of its landscapes and the high possibility of spotting animals. We will come across the spectacular Tranco de Beas dam, which has turned the Bujaraiza Castle into an island. A couple of viewpoints and a park with animal species living in semi-free conditions (wild boar, deer and fallow deer) make this the ideal family-friendly route.

BOLONIA DUNE

Estrecho N.P.

The town of Bolonia (Tarifa) is the starting point for a route along one of the most prized beaches of Andalusia, in terms of nature and culture. The spectacular Natural Monument of the Bolonia dune, a 30 metre tall white sand dune, marks the end of this route. If it has rained, we will come across temporary lakes with abundant wild bird species.

MAJACEITE RIVER

Sierra de Grazalema N.P.

The lower end of the beautiful village of Benamahoma sees the start of an extremely popular route given the beauty of El Bosque. Riparian vegetation with a vast diversity of birds, with trout and otter in the river, along with a wide selection of plants in the Castillejo botanical garden. A number of mills mark the riverbanks.

Sea, rivers, shade. Why
not enjoy the cooler side
of Andalusia during the
warm summer.

The best routes... IN SUMMER

RIO DE LA MIEL

Los Alcornocales N.P.

The route begins in the El Cobre district (Algeciras) and it will take us on a magical journey through deep narrow valleys, secluded by humid gallery forests. A mythical route, given the characteristic environment of the Tertiary period, the partially stoned pavements, the medieval bridges and the old flour factories.

CUESTA MANELI

Doñana N.P.

Km 30 of the A-494 is the start of a short route, but with plenty to see. The fossil dunes of Asperillo, with its colourful overhanging cliffs, the presence of animals in Doñana, betrayed by the footprints and tracks in the sand, including the lynx and vipers. Finally, an immense sandy beach.

RIBETEHILOS

Doñana N.P.

From the old reforesting town of Cabezudos (Almonte) we come to the Abalario site and the start of the route. Wooden boardwalks will take us over rows of peat bog-lakes, surrounded by the cool shade of the pine forest, the fragrance of the scrub brush of the drier ridges (Monte Blanco) and where we can spot countless birds.

PUNTA DEL BOQUERON

Bahia de Cadiz N.P.

The route takes us along a sandy strip between the marshland of the Sancti-Petri river course and the dune system of the virgin beaches of Camposoto, dotted only with the old bunkers and military posts that protected San Fernando. On the horizon is the outline of the castle on the little Sancti Petri Island and countless species of birds can also be seen.

JABALI-ENCINAREJO

Sierra de Andujar N.P.

A route begins at the Jabali recreational area that takes us to the Jandula River and one of the first dams to be built to produce energy. Amid pine forests and Mediterranean woodlands we will feel the silent presence of the lynx or the wolf. Another recreational area next to the river sees the end of the route: Encinarejo.

Cultural and ethnological heritage, archaeological landmarks, relict and hundred year old festivals along these routes where you will not only discover our rich natural heritage.

The best routes... FULL OF HISTORY

LA ERMITA

Sierras Subbéticas N.P.

The route begins at the old Cabra train station and it takes us to the highest point of the mountain, at 1,200 m, where the Virgen de la Sierra chapel is located, known as the 'Balcon de Andalucía' (Balcony of Andalusia), as 5 provinces can be seen from this point. It is a tough climb that takes us through olive groves, holm oaks and gall oaks.

CERRO DEL MAULLO

Sierra de Huétor N.P.

The visitor's centre at Puerto Lobo (Viznar) is the start of a route that will enable us to walk through pine forest repopulation areas, smell the magnesium-enriched dolomites, see the mountainous side of Granada and descend into ravines and enjoy the changing colours of the vegetation. There are still trenches dotted across the hills of the Cerro Maullo, a strategic point during the Spanish Civil War.

EL SANTUARIO

Sierra de Andújar N.P.

The route begins before the last crossing to the Virgen de la Cabeza sanctuary and it takes us through a wild landscape where legend and tradition come together, as it is home to one of the most important pilgrim routes in Spain. Black pines and incredible views of Los Pedroches and Sierra Madrona.

EL TALENQUE-VALDELARCO

Sierra de Aracena y Picos de Aroche N.P.

The recreational area of El Talenque (Galaroza) sees the start of an historic route for the merger of the mountain villages. The stone wall border along the track accentuates the route that will take us along the Navahermosa ravine to the Valdelarco stream. A route that truly represents the landscapes and ecosystems of this mountain range.

ASCENT TO THE PICO DEL CIELO

Sierras de Tejada, Almijara y Alhama N.P.

The entrance to the Nerja Cave is the start of a route that takes us to an ancient stronghold that belonged to the Maquis until 1954, then to the bandits and then became a Moorish stronghold. The route ascends to 1,508 m and offers marvellous views of Africa and the Costa Tropical and the Costal del Sol, as well as Sierra Nevada and of course the sea.

EL PINSAPAR

Sierra de Grazalema N.P.

The road to the Puerto de Las Palomas (Grazalema) is the start of a route through the rainiest place in Spain. This is the region of the Spanish fir par excellence, a fir tree that is a vestige of the Tertiary period. The Pico del Torreón and the mountain goats are onlookers as we journey through the dense fir tree forest.

BARRANCO DE VIZNAR

Sierra de Huétor N.P.

A point close to the Puerto Lobo visitor's centre sees the start of a route marked by the murder of the poet Federico García Lorca, since this ravine has been pinpointed as the place in which the murder took place. There are magnificent landscapes with various types of pines and holm oaks. The Darro and Fardes Rivers and wild boar or mountain goats can be spotted along the route.

BARRANCO DE VALDEAZORES

Despeñaperros N.P.

The route begins at the Valdeazores forest house and follows the stream down a ravine covered with Mediterranean vegetation. This route also has an enormous historical value, since the road to Andalusia through Despeñaperros opened in 1786. We can admire the natural monument of Los Organos from a viewpoint.

The trail awaits us with an
unexpected gift along the way.
We must keep going until we
find it.

The best routes... WITH A SURPRISE FACTOR

LA LAGUNA DEL MORAL

Los Alcornocales N.P.

The recreational area of La Sauceda (Cortes de la Frontera) is the starting point of a route that takes us to a magical lake given the stunning beauty of the area: Surrounded by a dense forest with a variety of animal inhabitants. At the Pasadallana gorge we will discover a formation that is unique to Los Arconocales: A slot canyon, a narrow stream covered in fern.

Footprints, songs, traces... The rich Andalusian fauna that can be spotted, felt or sought, awaits us along these routes, where binoculars will be of great use.

The best routes... WITH FAUNA

CALATILLA DE BACUTA

Marismas del Odiel N.P.

The Anastasio Senra Visitor's Centre, where the freshwaters of the Tinto and the Odiel rivers meet the Atlantic, providing these marshlands with an extraordinary multitude of bird life in particular, sees the start of this route between the salt lakes of Salinas de Bacuta and Caño de Calatilla. We will see flamingos and the largest colony of spoonbills of the Peninsula.

LAS ALBINAS

Laguna de Fuente de Piedra R.N.

The route begins at the Jose Antonio Valverde visitor's centre and takes us to the north side of the largest lake in Andalusia, covering an area of almost 1,400 hectares. An observatory and a viewpoint enable us to admire the wealth of bird life, with up to 170 species and a large number of flamingos. The vegetation has adapted to the salinity, with characteristic salt marsh plants.

EL OBSERVATORIO

Laguna de Zoñar R.N.

The Laguna de Zoñar visitor's centre, with the deepest lake in Andalusia is the starting point for a route that will take us to an observatory where we can enjoy the wide variety of birds in this lake complex. Coots, grebes, mallard and the white-headed duck can be spotted from here and from the route that branches off from it, La Carrizosa.

LAS BUITRERAS

Sierras Subbéticas N.P.

The route begins at the town of Luque and heads towards two recreational areas where we will pass a tree classed as unique given its size: an almond tree. But the great attraction are the canyon walls of the Abuchite, with the spectacular continuous flight of the colony of vultures nesting in them together with jackdaws and red-billed choughs.

FUENTE DEL OSO - PUENTE DE LAS HERRERIAS

Sierra Cazorla, Segura y Las Villas N.P.

The route begins at Fuente del Oso, where the Empalme del Valle route ends, amid pines, junipers and holm oaks. This is the land of wild boar and Duchas de la Mesa, where the water filters out from the stone and showers down. And finally we reach the Puente Bajo where a very young and still very humble, Guadalquivir flows.

Permission must be request in the Provincial Delegation of Environment in Cordoba (Tel. 957 00 13 00).

SIERRA DEL VIENTO

Sierra Norte N.P.

The relatively easy route begins near to the Santo Cristo chapel (Guadalcanal) and takes us to La Capitana, the highest point of the mountain range (950 m). The routes takes us passed an astronomy observatory, although the views of the landscape at ground level are just as impressive, with the wide open areas of Seville and Badajoz.

ASCENT TO EL CHULLO

Sierra Nevada N.P.

El Chullo, at 2,611 m, is the highest summit of Almería. The route begins at Puerto de la Ragua (2,038 m) and takes us to the marvellous viewpoint of the Almería region of Sierra Nevada, to then descend to the Laguna Seca (Dry Lake) which is sometimes full. This is an area often used for cattle grazing, an activity carried out since the Neolithic period.

EL ROBLEDAL-LA MAROMA

Sierras de Tejeda, Almijara y Alhama N.P.

The ascent, which begins at the recreational area of El Robledal (Alhama de Granada), takes us to the highest point of Málaga (2,066 m). We will walk through pine forests to the mountain shrub land, always enjoying magnificent views. There is no path along the final 2 kilometres of the route, so special care must be taken in terms of the terrain and direction.

CAÑO DEL AGUADERO

Sierra Magina N.P.

A route begins at the recreational area of the Cuadros River (Bedmar) that takes us through forests and Mediterranean highland, where we can enjoy stunning ravines and trees such as the Buxus, the Pinus Nigra or cedars. The route ends at one of the high mountain pasture areas, at 1,800 m, home to the Segureña sheep.

Andalusia's network of trails includes a number of routes that have been specially adapted to accommodate disabled people so that everyone can enjoy nature.

The best trails... ADAPTED

UMBRIA DE LA VIRGEN

Sierra Maria-Los Velez N.P.

The accessible route is located within the botanical gardens of Umbria de la Virgen, offering the characteristic quality of the Andalusian Network of Botanical Gardens in Natural Areas. The botanical garden is made up of different areas: ethnobotany, protected species, cultivated species, steppe, gypsum deposits, clayey land, salt marsh, rocky areas and uplands and highlands, as well as an area dedicated to Altmühlthal, a twin nature park in Bavaria.

EL ROBLEDO BOTANICAL ROUTE

Sierra Norte

The botanical garden of El Robledo offers visitors a route in which they can discover the characteristic plants of the Mediterranean woodlands and forests and see how they have adapted to specific climate conditions. The route simulates a climb from the lower areas of Sierra Morena. The route therefore begins amid wild olive trees, to then take us through rockrose plants, holm oaks or gall oaks. Finally, the trail descends to a stream with its river edge vegetation. The botanical garden is also home to the more traditional plant varieties.

Long distance routes enable us to discover Andalusia through its ancient paths.

Long distance routes

ANDALUSIA

Ancient ways

The details

The long distance routes are identified by a red and white sign.

The long distance routes are designed for those who enjoy routes that are more than one day long. Most of them follow traditional routes along the original paths that enable hikers to be in contact with nature and also to discover the rich cultural and ethnographic heritage of villages that are somewhat off the beaten track. When these routes have been approved by the national and regional mountaineering federations as Long Distance Routes, they are identified with a red and white colour, with the letters G and R (Gran Recorrido – long distance route) in

Information about culture, fiestas, gastronomy and places of interest

capital letters, without any spaces or full stops between them followed by a white space and the corresponding number, which makes the routes easy to follow. In general terms they have to be at least 50 kilometres long, although some are over 2,000 kilometres long. Most of them are included in a European network of routes. Andalusia is one of the autonomous communities with the largest number of Long Distance routes.

In order to enjoy our chosen route, it is vital to have some form of organisation in terms of accommodation, food and basic en-route services. There is a very good network of hostels, shelters and information points to help us with this task.

Access routes to Seville

From Madrid: A-4 Motorway

From Malaga: Autovía A-92

From the North: A-66 Motorway (Autovía de la Plata)

From Cadiz and Jerez (South): AP-4 and N-IV

From Huelva (west): A-49

Other access routes: by train (Santa Justa Station and Suburban train stations) and by plane (San Pablo Airport and Jerez Airport)

Although the Camino de Santiago (Way of Santiago) along the Via de la Plata is not an official long distance route (GR-Gran Recorrido), it is one of the most transited routes in Spain, on foot, by bicycle or on horseback. There are approximately 1,000 kilometres between Seville and Santiago, depending on the diversions, and 87 kilometres pass through Andalusia until El Real de la Jara, the last town in Andalusia before entering Extremadura. The route can be split into four reasonably easy stages, with the exception of the ascent to the Cerro del Calvario. These are Seville-Guillena, Guillena-Castilblanco de los Arroyos, Castilblanco de los Arroyos-Almadén de la Plata and Almadén de la Plata-Monesterio (this last town is located in the province of Badajoz). In order to access the hostels (albergues) you should carry your pilgrim passport, which can be obtained from the Seville Association of Friends of the Camino de Santiago.

The details

The GR-7 long distance route forms part of a European route, the E-4, which covers the entire continent, including the Peloponnese in Greece.

The GR-7 long distance route is the longest in Andalusia, with 1,250 kilometres distributed across five provinces. It begins in Tarifa (Cádiz) and ends in La Puebla de Don Fadrique (Granada). In the province of Cádiz it crosses the Ojen Mountains and the Natural Parks of Los Alcornocales and Grazalema, until it enters Málaga through the Ronda mountain range, El Chorro and the Valle de Abdalajís Mountains. The southern route passes through Alhama de Granada, Sierra de Baza and the Alpujarras region of Almería and Sierra Nevada. On the other hand, the northern branch passes through the province of Córdoba, through the Sierras Subbéticas and through the province of Jaén, through the Natural Parks of Sierra Mágina and Cazorla, Segura y Las Villas, until it meets the southern branch again and ends in La Puebla de Don Fadrique.

1. The route begins in the windy dunes of Tarifa.
2. White town.
3. Fuente de Piedra Natural Space.

2. Landscape in the Alpujarras.

1

The Sulayr route is the longest circular route in Spain. It goes along the edge of Sierra Nevada, reaching its highest peaks and covers countless beautiful villages that make this long distance route one of the most interesting in Andalusia. Sulayr is divided into 19 stages, covering 300 kilometres and connecting the different towns of Granada and Almería and the cultural and environmental facilities open to the public (shelters, nature workshops, visitor's centres...) which will provide logistical support for hikers.

The Sulayr route begins at the El Dornajo Visitor's Centre, the main gateway to Sierra Nevada. However, as it is a circular route, it can be started anywhere along the trail, although this is the recommended route as it avoids steep gradients.

Access

From Santiago de la Espada the A-317 leads to La Puebla de Don Fadrique. 2.1 km on, to the right, follow the JF-7091 road to the small village of Don Domingo. From here a forest trail leads to the Ramblaseca control, in the Campos de Hernan Perea.

1

2

The details

There are 125,000 km of livestock paths in Spain, classed as public domain goods.

The GR 144, the nomadic route covers 78 kilometres of the province of Jaen along livestock paths that have served as a route for cattle for centuries. It begins at the Ramblaseca access control, on the border of the Natural Park of the Sierras de Cazorla, Segura y Las Villas, located in a unique area in Spain: The Campos de Hernan Perea (or Pelea), the largest high plateau in Spain, boasting a height of 1,600-1,700 metres. From here it heads north passing through Don Domingo, Pontones Altos, Hornos de Segura and Mocho Bridge in Beas de Segura, across four stages.

The main points of interest include the Segura River source and an enormous *Pinus nigra* subsp. *Iaricio*, known as Galapan,

dominates the high plateau of Don Domingo, standing almost 40 metres high. Authorisation has to be obtained from the Environment Department or from the Visitor's Centre, given that this route enters the Natural Park.

Transhumance is a traditional farming practice that is still carried out today. During the winter the livestock graze on pastures in the south of the Iberian Peninsula, while in the summer they move on to the green fields of the north. Over the centuries, this bustling activity has resulted in an extensive and intricate network of brooks, tracks and cattle routes that are still used by shepherds today, but which can be, and in fact are, also a tourism resource.

Access

To Santiago de la Espada, the starting point of the GR long distance route on the border between the communities of Andalusia and Castilla La Mancha, is via the A-317, a road that comes off the N-322 at Puente de Genave.

1

The details

Given that this GR route crosses part of a Natural Park.

The GR 147 Sierra Profunda crosses part of the Natural Park of the Sierras de Cazorla, Segura y Las Villas through the towns of Santiago de la Espada, La Toba, Fuente del Esparto, Los Anchos, Prado Maguillo, Prados de la Mesta, Rio Madera, Segura de la Sierra and Siles, with the 147.1 diversion from Segura de la Sierra to Orcera and Benatae. This route offers the unique opportunity of discovering one of the densest forests and the summits of one of the largest Natural Parks in Spain.

It passes through spectacular landscapes with little villages in which the locals have had to adapt to the harsh environment of these mountain areas. The Moorish castle of Segura de la Sierra, a beautiful mountain village where the 15th century poet, Jorge Manrique, was born, is definitely worth visiting just to enjoy the spectacular views, and the peaks of Calar del Pino or Cuesta de Despiernacaballos, which offers unbeatable

2. You can obtain information about this route at the Torre del Vinagre.

views from its sheer cliffs, the *Pinus nigra* subsp. *Iaricio* forests from the Madera River, the source of the Segura River or the La Toba spring, which emerges from a cave. Despite the harsh geography and climate of this area of the Park, there is also an abundance of fauna, with important species such as the deer, the wild boar, the Spanish wild goat, the golden eagle, the Eurasian eagle-owl, the badger or the native squirrel.

The details

El Caminito del Rey is one of the most spectacular and impressive paths you can go in Andalusia. Booking is required.

More information:
www.caminitodelrey.info/

With over 400 kilometres distributed over 35 stages, the 'Gran senda de Málaga' (the Great Malaga Path) is a route that is sure to surprise hikers, as it covers a large variety of landscapes and ecosystems, from the beaches of the Costa del Sol coastline to the inland mountain landscapes and passing through beautiful countryside. The GR 249 brings together sports, tourism and the environment in a single route. The Great

Malaga Path, a circular route (it begins and ends in the city), covers the inland areas of the province or the nearby areas of four Natural Parks, two Nature Reserves and three Natural Sites. It is the most recently inaugurated route in Andalusia (2014). It joins a number of local routes and two long distance routes, the Mozarabic Way of St. James and the European route, GR-92 E-12 that ends in Greece.

2

During the spring, the Great Malaga Path organises a series of interpretative visits along six chosen routes that enable visitors to discover the environmental and touristic values of the towns and villages of Málaga. These routes are free of charge and offer specialist self-insured guides. Registration and information about the routes can be obtained from the official the 'Gran Senda de Málaga'.

Access the website
from your mobile
phone:

The Natural Park of the Sierras de Cazorla, Segura y Las Villas in the south of Spain, is home to the largest forested area in the country and one of the best preserved forests of Europe.

A long distance route, the GR 247 Forests of the South, delves into this protected area, with one of the largest circular routes in Spain, covering almost 500 kilometres, which includes various diversions. This route has plenty to offer, such as the sources of the Guadalquivir and Segura Rivers, high mountain areas that are still home to a number of inhabited villages, castles and historic places, high plateaus and lush valleys, transhumance routes and crop fields. The flora and fauna in this area is

among the most spectacular in Andalusia, with species such as the bearded vulture, the Spanish wild goat, the mouflon, the fallow deer, the griffon vulture and the golden eagle, among others. A whole host of experiences await us on this great route that offers top quality infrastructures.

The entire GR 247 route falls within the Natural Park, unlike other GR routes that cross them or border them. There are eleven overnight shelters throughout the route and the official Forests of the South website offers all the information hikers will need, including detailed maps and an in-depth description of each stage and even GPS tracks for all the stages, branches and diversions.

The 24 natural parks of Andalusia have more than one hundred signposted routes.

Cycling through Natural Parks

No waste. This is perfectly feasible; you will find suitable places for it.

If you are walking with a dog, the dog must be kept under control.

In general terms, it is not "best practice" to take wild fruits or minerals home with you and fossils and archaeological remains should never be removed. One traveller after another will end up overexploiting the area.

Respect private properties, land or livestock.

Utmost care should be taken not to start fires, the worst enemies of the Mediterranean forest. There are areas and manners in which fires may be lit, but they are strictly forbidden during the summer months. Use this trip to give up smoking.

Areas fenced off to protect flora or fauna must never be crossed.

Let the only evidence of your journey through nature be your own satisfaction.

Enjoy it in silence. Nature will surprise you with its sounds.

Cadiz, Huelva and Seville DOÑANA

Expanse **105,000 hectares.**

Landmark **Acebron Palace.**

Others **The name 'Charco del Acebron' (Acebron Pond) refers to the widening of the Rocina stream in the surrounding area of the Acebron Palace, which has led to the formation of a small lake.**

1. A fern forest in **Algaida del Meloncillo.**
 2. Inside the **Palacio del Acebron** Visitor's Centre.
 3. One of the walkways along the route.
 4. The **Acebron Palace.**
- The Acebron Palace**, a mansion built in the 1960s and restored as a visitor's centres, is the starting point of this circular route that crosses the Rocina stream. In the initial part of the route we will visit a very well-preserved riparian forest, with huge ash trees at the water's edge. We will then go through a willow plantation via a footbridge that takes us to a forest with stone pines and undergrowth made up of different woody species (hawthorn, rosemary, *Pistacia lentis*...). Another footbridge takes us back into the riparian forest made up of cork oaks, arbutus and a number of fern species. During the latter stage of the route we will

come across lush riparian vegetation thanks to the different tributaries (locally known as algaidas-bush) and riverbeds that flow into the Rocina stream.

Almeria, Granada SIERRA NEVADA

The route POQUEIRA VILLAGES

Full information
about this route
by scanning this
QR code

Route	
Length	9.4 km.
Duration	3h 30'.
Dificultad	Media.
Towns	Pampaneira, Bubion and Capileira.

1. Pampaneira is located on a hillside.
2. The Poqueira river.
3. An example of the typical architecture in the Granada Alpujarras.

The route that covers the Poqueira villages begins in the upper part of the Pampaneira and covers the south side of the Sierra Nevada massif via the river's cliff that the route is named after, passing through the villages of Bubion and Capileira. Between Pampaneira and Bubion, villages that are barely one kilometre apart, the route covers the typical terraced landscapes of the Alpujarras in Granada. After passing through Bubion and the Puente del Molino, the route descends gently for around 1.5 kilometres to then begin a steep 800 metre climb that leads to the last village along the route, Capileira. From here a road leads to the Poqueira River, which is crossed via the Chiscal Bridge. There is a crossing at approximately 300 metres where we must take the left fork and after another 1,200 metres, we once again turn left at a turnoff indicated by an oak tree. The route continues through a number of country estates until it crosses the Poqueira River again and turns right to the main road which leads to the starting point in Pampaneira.

Access **A-4132.**
Landmark **Chiscal Bridge.**
Others **It is advisable to take drinking water.**

Almeria CABO DE GATA-NIJAR

Expanse 49,500 ha.

Towns Almería, Carboneras, Níjar.

1. One of the hidden coves of the protected site.
2. Dusk in the Natural Park.
3. Common architecture in the local villages.
4. Sand dunes are very common in Cabo de Gata.

There is nothing quite like Cabo de Gata-Níjar, not in the sea or on earth. Its sub-desert landscape, with extinct volcanoes, mineral traces, fossils and cultural vestiges related to the use of water – water reservoirs, waterwheels, wells- together with a beautiful and virgin mineral coastline, with seabeds full of animal and plant life. An almost mystical landscape.

Discover all the details about this Natural Area

The route **ESCALLOS-** **ISLETA DEL MORO**

Full information
about this route
by scanning this
QR code

Route	↔	Acceso	AL-4200.
Length	1.6 km.	Landmark	Isleta del Moro.
Duration	40'.	Others	It is essential to take drinking water. There is no shade along the route.
Difficulty	Low.		
Towns	Almería and Níjar.		

The route begins on the north side of the village of Los Escullos, where the Los Arcos beach meets the cliffs. A short walk along the coastline, barely 1.5 kilometres, leads to the Isleta del Moro, which can be seen from the start of the route. At the beginning the route runs along the beach for about 500 metres and then the sand changes to a rocky reef, where the Posidonia oceanica meadows can be seen along the seashore. After passing a house, the route then goes along another beach, smaller than Los Arcos, practically always bordering the shoreline, barring a few sections. During the last part of the route we will come across a small palm grove and stairs will take us up to the Isleta del Moro viewpoint.

1. The entire proposed route is within earshot of the sea.
2. Typical coastal village.
3. The route begins on the Arco Beach.

Almeria SIERRA MARIA- LOS VELEZ

Expanse 22,500 ha.

Towns Chirivel, Maria, Velez Blanco, Velez Rubio.

1

The high snowy peaks in winter, amid the arid landscape, store water to be distributed into valleys in the shape of springs and streams. Lush forests made up of allepo pine, *Pinus nigra* subsp. *Iaricio* and holm oaks live in a region that is full of caves with remnants of artwork, including the famous Indalo. A land of birds of prey, unforgettable castles, such as Los Velez and almond trees.

2

3

4

1. Rocky outcrops can be seen on the Mountain.
2. A lonesome tree on a prairie.
3. The Park has a number of information boards.
4. Sierra Maria-Los Velez in spring.

The route

UMBRIA DEL MAIMON

Full information
about this route
by scanning this
QR code

Route	
Length	8.9 km.
Duration	4 h 30'.
Difficulty	Medium.
Towns	Maria and Velez Blanco.
Access	A-317.

Landmark	Collado de las Arenas.
Others	It is essential to take drinking water. Walkers should take extra precautions at road intersections because of traffic.

The route begins at the exit from Velez Blanco, a municipality with interesting monuments such as the Marqueses de los Velez Castle, which can be seen from the entire route. The first ascent takes us to the Collado de las Arenas viewpoint and a little further on to Los Llanos de Ijarro, through olive groves and almond trees. The route continues, following the course of the Claro River ravine until the Fuente del Peral, close to the country estate with the same name. We turn left off the path (continuing straight on leads to the Solana del Maimon route) to continue towards Maria, by climbing the

Cuesta del Perentin. The last section takes us under the Peñon de San Blasco, the Umbria de la Virgen (an area of special protection within the Park) and the almond groves of the Cortijo de la Peguera, to then reach Maria, the end of the route.

1. **View of Velez Blanco.**
2. **Vegetation on the hillsides of Sierra Maria-Los Velez.**

Cadiz BAHIA DE CADIZ

Expanse 10,500 ha.

Municipios San Fernando, Chiclana de la Frontera, Puerto Real, Puerto de Santa María and Cadiz.

1. The fishing tradition has always had a strong presence in the Bay of Cadiz.
2. Salt lakes in the natural park.
3. Birdwatching is one of the most popular activities.

Surrounded by municipalities full of history and unique sites, are the marshlands and channels of the Bay of Cadiz. The Guadalete and San Pedro Rivers and the marine tides, create an environment full of bird and marine species that in turn lead to an exquisite gastronomy that includes its own famous salt. The small island of Sancti Petri, with the Hercules temple, outlines a horizon, famous for its sunsets.

The route LOS TORUÑOS

Full information
about this route
by scanning this
QR code

Route		Access	CA-32.
Length	5.2 km.	Landmark	Salinas de los Desamparados.
Duration	2 h.	Others	It is essential to take drinking water. The route begins 500 metres from the Venta el Macka restaurant, on the Valdelagran urbanisation.
Difficulty	Low.		
Towns	El Puerto de Santa María.		

This route covers the best-kept marshlands in the Bahía de Cádiz Natural Park, through the Marismas de los Toruños Metropolitan Park. There is a gate on the Valdelagrana beach path with an information board that indicates the start of the route.

The San Pedro River runs along the left of the track and on the opposite side, we can see the Desamparados Salt Mine. We have to cross the Caño del Bote, the first of the three access points to the Levante

beach. At the third point, we cross the San Pedro River to Pinar de la Algaida and then another wooden bridge, over the Caño del Caseron. There is a wooden viewpoint tower visible in the background that offers marvellous views of Cádiz and Puerto Real. Further along, a track leads to the Levante beach, but we have to continue along a walkway to the Los Toruños viewpoint, the end of the route between the marshlands, the San Pedro River and the Punta de Saboneses.

1. Bridge in Los Toruños
2. Vegetation

Cadiz LA BREÑA AND MARISMAS DEL BARBATE

Expanse 5,100 ha.
Towns Barbate and Vejer.

The route TORRE DEL TAJO

Full information
about this route
by scanning this
QR code

Route		Access	N-340, A-314, A-2233.
Length	2.1 km.	Landmark	Torre del Tajo.
Duration	45'.	Others	It is essential to take drinking water. The end of this route sees the start of two others: Los Caños-Torre de Meca and Sendero del Acantilado.
Difficulty	Low.		
Towns	Barbate.		

The start of the route and the entire route is perfectly signposted and is not difficult. 200 metres from the start, in the municipality of Barbate, the track enters a dense forest that conceals the sea view. A little further along, the road turns right and follows a straight line until another turning left this time, 50 metres before crossing a fire-break.

From here we can see the Acantilado route, which begins where this track ends: At the Torre del Tajo, a 16th century lookout tower declared a Place of Cultural Interest. Almost the entire route runs through pine

1. It is quite common to come across harmless cattle along the route.

2. Torre del Tajo, the lookout tower that the route is named after.

nut trees and junipers, as well as shrubs such as Pistacia lentisc, wild olive trees, rockrose... A number of animals live in the area including foxes, ichneumons or chameleons however, they are difficult to spot.

Cadiz DEL ESTRECHO

- Visitor Center
- Parking
- Cortijo
- Viewpoint
- Recreational Area
- Elevation

1. The Cerro del Tambor route offers spectacular views.

The route begins at the Huerta Grande Visitor's Centre, in the Pelayo district, with a gentle descent of approximately 800 metres until we reach a crossing where we have to take a tight right turn (from here we will be able to see the African coastline). We have to cross a group of houses and cultivated land until we enter the Mediterranean area of the Estrecho Natural Park, with cliffs and pebbled beaches. We then pass through the La Joya country estate and the Malaber stream to then enter a low forest that borders a hillside where cattle normally graze.

Further along we climb towards the Canchos de los Parrales and a wind park to continue along a dirt track on the right hand side towards the mouth of the Guadamesi River. Finally, a path on the left will lead us to an old bunker now converted into a viewpoint; this is the end of the route, from where cetaceans such as dolphins or pilot whales can often be spotted.

Cadiz, Malaga **LOS ALCORNOCALES**

Expanse **168,000 ha.**

Towns **Alcala de Los Gazules, Algar, Algeciras, Arcos de La Frontera, Los Barrios, Benalup-Casas Viejas, Benaozaz, El Bosque, Castellar de La Frontera, Jerez de La Frontera, Jimena de La Frontera, Medina Sidonia, Prado del Rey, San Jose del Valle, Tarifa, Ubrique, Cortes de La Frontera.**

- 1. Hikers in the Natural Park of Los Alcornocales.**
- 2. The Park's forests are among the most spectacular in Andalusia.**

The southernmost cloud forest, a true Mediterranean jungle, with little streams closed in by the Tertiary vegetation... Los Alcornocales is pure magic, an area full of rainwater or seawater, where we can hear invisible animals and where we can enjoy unexpected views of the sea or the mountains. It is home to countless numbers of birds of prey, aromatic plants, roe deer, fallow deer and deer, making this a truly unbeatable area.

Discover all the details about this Natural Area

The route LA CALZADA DEHESA BOYAL

Full information
about this route
by scanning this
QR code

Route		Access	A-405, CA-9201.
Length	6 km.	Landmark	Castellar de la Frontera.
Duration	2 h.	Others	It is essential to take drinking water. The route partly coincides with the long distance route GR-7, which connects Tarifa with Andorra and even reaches Greece.
Difficulty	Low.		
Towns	Castellar de la Frontera.		

The route begins a few metres past the Venta Jarandilla restaurant, on the right hand side of the road. The route begins along a very well preserved stone path, thought to be a Roman road. A little further along is the Calzada Viewpoint, where it is worth stopping to see the incredible fortress of Castellar; the views across the entire region are wonderful. The route runs parallel to the road until it reaches the Natural Park's Information Point, situated on the outskirts of Castellar. From here we reach the medieval precinct and after this, we have to follow the Fuente Vieja track.

After visiting it and returning to the castle, the route carries on along the north for 1,500 metres where we will come across the pre-Roman tombs. The route then circles round to return to the starting point, the CA-0527.

1. The imposing relief of the Sierra de Grazalema.
2. Spectacular view of Zahara de la Sierra and its reservoir.

Cadiz, Malaga GRAZALEMA

The route **SALTO DEL CABRERO**

Full information
about this route
by scanning this
QR code

Route	
Length	7.2 km.
Duration	2 h 30'.
Difficulty	Medium.
Towns	Benaocaz and Grazalema.
Access	A-372.

Landmark **Ojo del Moro viewpoint.**

Others **Along the route we will come across areas with limestone and furze, the two elements required to make lime, which is used to whitewash the mountain village houses.**

The El Boyar mountain pass (1,109 metres), 3.5 km from Grazalema, is the starting point for this route, close to the source of the Guadalete River. A forest track leads to pine forest, which then changes to holm oaks, gall oaks and hawthorn. After passing a little summit and the Casa de las Albaradas we have to take a path to the left that will lead us to quite a dense forest. A few ascents and descents will take us to a flat area surrounded by mountains, from where a new path to the southwest will lead us to the point which gives the route its name: The impressive Salto del Cabrero. After returning to the flat area, we then have to descend again to the Don Fernando mountain pass, to then descend again to the Pajaruco stream. From here a short walk takes us the final point of the route, Benaocaz.

Cordoba **SIERRAS SUBBETICAS**

Expanse **32,000 ha.**

Towns **Cabra, Carcabuey, Doña Mencia, Iznajar, Priego de Cordoba, Rute, Luque and Zuheros.**

- 1. Cabra.**
- 2. Birdwatching is one of the many activities that can be enjoyed in the Sierras Subbeticas.**

1

Discover all the details about this Natural Area

This geo-park offers a geological display and unbeatable caves and potholes. Thanks to the water perforating the mountains, there are channelled rivers or majestic fountains in its beautiful villages such as Zuheros and Priego. The peaks of Picacho and LaTiñosa, offering views across Andalusia, caves such as the Murcielagos or the abundance of wild mushrooms, all form part of the elements that make this park so appealing.

The route **BAILON RIVER**

Route		Landmark	Picacho de la Cabra.
Length	12 km.	Others	Authorisation must be obtained (from the Environment Office, Santa Rita Visitor's Centre, the Cueva de los Murciélagos Eco-museum or the Zuheros Tourist Information Point).
Duration	6 h 30'.		The route cuts across private properties.
Difficulty	Medium.		
Towns	Cabra and Zuheros.		
Access	A-405, CA-9201.		

Full information about this route by scanning this QR code

1. Hiker in the Sierras Subbéticas.
2. Flora within the Park.
3. Zuheros.

The route begins in the Venta de los Pelaos, near Santa Rita Visitors Centre, on a road that runs along the spectacular geological formations of Lapiáz de los Lanchares.

4 km after the start, we reach the Picacho de Cabra, offering fabulous views of the surrounding areas. This is where the actual Rio Bailon route begins, along the Nava de Cabra, a karst polje or flat area enclosed by mountains, where the source of the main river along the route is located. After crossing the polje, we will pass a holm oak forest which will take us to the Arrebol and Fuenfria plains. A narrow trail will guide us to the Cerro del Zumacal and from here the route descends until it meets the Bailon River again, this time through a narrow canyon, which will lead us directly to Zuheros. In this small village, which marks the end of the route, the Murciélagos Cave is worth a visit.

Cordoba SIERRA DE HORNACHUELOS

Expanse	60,000 ha
Towns	Almodovar del Rio, Cordoba, Hornachuelos, Posadas, Villaviciosa de Cordoba

One of the most beautiful areas of grassland and riparian forests of Andalusia. The Bembezar, the Retortillo and the Guadiato rivers cut through the park, which is home to a community of birds of prey and a huge colony of cinereous vultures. And it has some delightful areas: Willow trees, reservoirs, pasturelands and villages, such as San Calixto. The honey, the Almodovar castle or the game in the area are experiences that have to be enjoyed in Hornachuelos.

- 1.** Hornachuelos, with its Caliphal castle in the foreground.

Route		Access	CO-5314.
Length	13.3 km.	Landmarks	Poblado del embalse.
Duration	4 h.	Others	It is essential to take drinking water and to make sure the water from the springs along the way is safe to drink.
Difficulty	Medium-low.		
Towns	Hornachuelos.		

1. The Bembezar runs between the hillsides of the Sierra de Hornachuelos.

To start the route we have to cross the diversion dam over the Bembezar River, in the extreme south of Hornachuelos. The route always runs north, leaving the reservoir on the left. Approximately 800 metres along, we cross a small stream and two kilometres further on, after a sharp bend, we will come across an amazing old abandoned building: The Santa María de los Angeles Convent, built in the 15th century, although the oldest preserved building is the 18th century chapel. We follow the route and approximately 500 metres along, the first nests appear, a characteristic feature of this route. We will cross three streams, the Guazulema, Cinco Aguas and Calderas; a track leads from the latter to the end of the route in the Poblado del Embalse over the Bembezar River.

2. Cattle breeding is one of the main activities in the region.

3. The beautiful pasturelands can be enjoyed along the route.

1. The colourful bee-eater.
2. The Park is home to some of the best preserved pasturelands in Europe.
3. Stones are a fundamental building element in this area of Cordoba.

1

Discover all the details about this Natural Area

A serene land of green pastures, except in the Yeguas and Arenoso Rivers, a rugged area inhabited by otters and lynx. Pine forests and Mediterranean woodlands complete a setting where birds of prey, game and Iberian pork and beef products abound. An absolute must is a visit to Montoro, with the famous meandering Guadalquivir, or the Cardeña villages situated on the old route to Castille before Despeñaperros emerges.

The route

ALDEA DEL CEREZO-VENTA DEL CHARCO

Full information
about this route
by scanning this
QR code

Route	↔	Access	N-420, A-423, A-420.
Length	6.2 km.	Landmark	Loma del Garrullo.
Duration	2 h.	Others	Another three Park routes converge at Aldea del Cerezo and another at the Venta del Charco inn. The route crosses a number of livestock paths.
Difficulty	Medium-low.		
Towns	Cardeña.		

The starting point of the route, Aldea del Cerezo, is accessed along a track from Cardeña. The track begins to the south of the village and it continues along a livestock trail classed as a track amid the well-preserved pasturelands of Los Pedroches. 500 metres on, we take a left track and follow it another 500 metres until the Valdecañas

1

path, which we will follow southeast. After another 500 metres we will reach some cattle farms and we will follow the road right along another track. We climb the Loma del Garrullo and when the descent begins we will come to a crossing where we must go straight on. One kilometre from this point we will cross a small Pyrenean oak forest, the only ones in the province of Córdoba. A kilometre and a half later, the track ends at the Venta del Charco inn. The route follows livestock trails, as indicated by the profuse and recent signposts. These trails form part of a huge network of tracks stemming from the Middle Ages throughout Spain and for centuries they were the only way of joining up the areas.

3

1. The striking fauna in Sierra de Baza.
2. Snowy peaks during winter.
3. The Negratin reservoir, in the surrounding areas of the Park.

In the middle of a steppe is a huge mountain reaching over 2,000 metres. A mountain that hides a mining soul, once perforated by Man, but which today shows us the beauty of its flora and its autumns full of wild mushrooms and truffles. The perfect complement is the monumental and spectacular town of Baza, in the centre of a broad valley.

The route

MIRADOR DE NARVAEZ

Full information
about this route
by scanning this
QR code

Route		Landmark	Narvaez Visitor's Centre.
Length	3.2 km.	Others	The starting point for this route is the Narvaez Visitor's Centre, which is worth visiting to get an in-depth overview of the characteristics of the Sierra de Baza Natural Park.
Duration	50'.		
Difficulty	Low.		
Towns	Low.		
Access	A-92.		

The route begins in the Narvaez Visitor's Centre in the Sierra de Baza Natural Park, which is accessed via the A-92 motorway (via the exit at kilometre 324).

From here an easy track takes us to the Narvaez Viewpoint, a fire watchtower adapted for tourism purposes, since it of-

fers marvellous views of the Natural Park. To the south we can clearly see the Calar de Santa Barbara peak, which is 2,271 metres high and is the highest point of the Sierra de Baza Natural Park. We can also see the Narvaez country estate (Visitor's Centre) and the Casimiro country estate, together with old mining installations such as the Poblado del Tesorillo, which bear witness to the presence in the area of important mining sites producing zinc or lead.

1. The Narvaez viewpoint offers spectacular views for visitors.

2. The lookout tower converted into a tourism resource.

Granada **SIERRA DE CASTRIL**

Expanse

The route

RIBERA DE JABUGO

Full information
about this route
by scanning this
QR code

Trayecto		Access	N-433, N-435.
Longitud	4.8 km.	Landmarks	Murtigas River.
Duration	1 h 45'.	Others	This is one of the most transited routes of the entire Natural Park. It brings together two towns with listed historic quarters.
Difficulty	Low.		
Towns	Galaroza, Jabugo and Castaño del Robledo.		

Both directions can be taken for this route but in this guide we recommend starting it in Galaroza, where the route will take us across the Murtigas River, barely 500 metres from the village. Near by the Jabugo River flows and a little further along we will cross another small stream amid a landscape marked by riparian vegetation. We continue south, keeping the Jabugo riverbank to our right. Two kilometres further on we will come across an old irrigation canal and we have to cross the river again, leaving the track that leads to Jabugo. At the next crossing we shall take a left and cross the river again, this time with no bridge, to start the climb to Castaño del Robledo along an old livestock route that comes from Cortegana. It is quite steep at the beginning but it becomes more gentle further on. In the last section we have to cross the Fuenteheridos road to enter the beautiful village of Castaño del Robledo.

1. One of the lakes that form part of the landscape of the Natural Park.
2. The sign for the Ribera de Jabugo route
3. Pizarillas square, in Galaroza.

Discover all the details about this Natural Area

This is the largest park in Spain. In its infinite highland profile, rock walls emerge amid deep valleys covered by forests with *pinus nigra* subsp. *laricio* and a large network of rivers. There are all sorts of active tourism activities on offer, which can be enjoyed on the ground, in the air or in water, or visitors can enjoy the exquisite game from the area and marvel at the endemic flora or visit the beautiful hamlets and spectacular routes.

The route **BOROSA RIVER**

Full information
about this route
by scanning this
QR code

Route		Access	A-319.
Length	7.5 km.	Landmarks	Cerrada de Elias.
Duration	3 h.	Others	It is advisable to take along sun protection in summer and sufficient drinking water is essential.
Difficulty	Low.		
Towns	La Iruela and Santiago-Pontones.		

- Route
- Visitor center
- Bridge
- Fountain
- Recreational center
- Natural monument
- ▲ Elevation meters

The route begins at the Andalusian Reference Centre for Aquatic Animals and it runs parallel to the Borosa River, a rich and varied fluvial ecosystem where the Charco de la Cuna stands out with its clean, crystalline waters. Although the route is always ascending, it is not very difficult and it also has a number of springs along the way such as the Astilleros near to the confluence of the Truchas Stream with the Borosa River,

which is crossed via the Puente de los Caracolillos. Once we reach a crossing, the main track will take us to the same destination point but without passing by the Cerrada de Elias, which we will visit by taking the right turn off. Here we will see a rare endemic plant in the Park, seldom seen in Andalusia: the crasilla, a carnivorous plant. At the end of the Cerrada de Elias there is a spring and further along we will cross a bridge to end the route at a power station. The Rio Borosa Visitor's Centre is located next to this route, which is the first important tributary of the Guadalquivir, situated in one of the most visited parts of the Natural Park and where visitors can discover the importance of water for ecosystems. The building is located next to an old fish farm, now converted into a research centre that has a viewpoint located in the premises.

1. **Fishing in the Borosa River, where there are some "no-kill" sections for trout fishing.**

Jaén SIERRA DE ANDUJAR

Expanse 75,000 ha.

Towns Andújar, Baños de la Encina, Marmolejo, Villanueva de La Reina.

1. One of the unique landscapes of the Sierra de Andújar.
2. The riparian vegetation is present throughout the Park.

This vast park is home to a natural wilderness. Amid its pasturales, steep mountains, forests and riverbanks are the lynx, the Spanish imperial eagle and the most rugged area is home to the last Andalusian wolves, needless to say, it is a huge virgin landscape. Hunting is very popular in the area and this is reflected in the local cuisine and it is also home to the Virgen de la Cabeza sanctuary.

The route LA CENTENERA

Full information
about this route
by scanning this
QR code

Route	
Length	6.7 km.
Duration	2 h 30'.
Difficulty	Medium.
Towns	Marmolejo.
Access	A-420, JV-5001.

Landmark	San Jose Chapel.
Others	Extra care should be taken in sections where there is road traffic. The Sierra de Andujar Natural Park is one of the last strongholds of the Spanish imperial eagle.

1

2

The route begins in Las Majadillas and it takes us up a continuous but gentle climb along a dirt track. The first section of the route runs parallel to the Agua ravine until we come across a fire-break which we leave to our left. The climb takes us to the Mezquita mountain pass and we have to be careful with the road intersections so we do not take the wrong one. We must always follow the JV-5001 east, until we reach a crossing when we do have to head right towards La Centenera.

Further on we will come across some ruins, leaving the Aguileras house on the left and the Tio Cano house on the right. The last section descends gently, the only descent along the route, which will take us to the remains of the San Jose chapel, which marks the end of the route. One of the most interesting features of this route along the Sierra de Andujar is the chance of spotting the only endemic bird species of the Iberian Peninsula, the Spanish imperial eagle, currently a critically endangered species, but in the process of being recovered. There are only 252 registered pairs in Spain.

- 1. Valmayor River.
2. Grosbeak in the
Sierra de Andujar.**

Jaen SIERRA MAGINA

Expanse **20,000 ha.**

Towns

Albanchez de Magina, Bedmar y Garciez, Belmez de la Moraleda, Cambil, Huelma, Jimena, Jodar, Pegalajar, Torres.

1. Snow is present on the Sierra Magina most of the year.
2. The mountains and the countryside come together on the border of the Natural Park.

A great and magical mountain range surrounded by a sea of olive trees. A rugged landscape for Man, with its virgin landscapes, dotted only with castles and fortresses. The Jaen peak, the Magina standing at 2,100 m, looks down on an area where the Cuadros rosebay stands out, the Zurreon waterfall and a Mediterranean and mountain forest indicating the caves and natural passages located within.

The route PINAR DE CANAVA

Full information
about this route
by scanning this
QR code

Route

Length **1.7 km.**

Duration **1 h.**

Difficulty **Medium-high.**

Towns **Jimena.**

Access **A-320, A-316, A-401.**

Landmark **Canava Chapel**

Others **Although we will come across aleppo pine forests along the route, there is very little shade along the route.**

PROFILE

The Virgen de Canava chapel marks the start of this route. We have to go around the temple to climb a tarmac slope until we reach the Pilas de Trista track. We cross the Canava Stream and from a river bed we begin a tough climb where we will see the peculiar Aznaitín peak, separated from the rest of the mountain massif.

We will leave a number of crossings on the left and, following the same track, we will reach the Pinar de Canava, a true botanical gem that is home to some of the oldest trees in Andalusia, some are over 250 years old that have been preserved practically with no human intervention whatsoever. In front, on the other side of the ravine, we will see an area known as Los Caracoles, with stone constructions that are typical of the area.

1. One of the magnificent trees that can be seen along the route.
2. Jimena castle.

Jaen DESPEÑAPERROS

Expanse
7,600 ha.
Towns
Santa Elena.

This small park has a steep relief and landscapes worthy of protection. The gorges such as Los Organos, El Salto del Fraile or the course of the Despeñaperros river are all located amid forests with oak trees, pine trees and holm oaks. As it is such a strategic route between the Spanish meseta and Andalusia, hints of ancient cultures still remain there. We can also trace the footsteps of the battle of Las Navas de

Tolosa in which the kingdom of Castille defeated the Almohads. This battle marked the beginning of the end for Moorish Spain and the start of the final phase of the Reconquest.

In terms of its environmental values, the thick forests of this Protected Site are home to wild boar and deer, which will not only surprise visitors along the route, they are also the basis of the highly recommended gastronomy of Santa Elena. Visitors may also spot magnificent birds of prey such as the Spanish imperial eagle and the griffon vulture.

1. A serene river in Despeñaperros.
2. Vegetation clinging to the rock crevices.

The route EL EMPEDRAILLO

Full information
about this route
by scanning this
QR code

Route	
Length	8.3 km.
Duration	3 h 40'.
Difficulty	Low.
Towns	Santa Elena.
Access	JA-7102.

Landmarks	Salto del Fraile Viewpoint.
Others	This route covers the area in which the Navas de Tolosa battle took place in 1212. There is a museum along the motorway, near to Miranda del Rey, dedicated to this military conflict.

150 metres from Miranda del Rey, along the road that leads to the town, we take a right track to head north. The circular route begins one kilometre away, where we take a left turn until we reach the Hornillo Stream. We will follow the stream for approximately 400 metres until we reach a fire-break to continue the ascent to a crossing located 900 metres further along. We will then walk another 700 metres to the El Hornillo house, where we will take a right turning and climb to another crossing where we will take a left. Very soon afterwards we will reach the road that will take us to El Empedraillo, a section of the route along a stone pavement (barely 100 metres long and three metres wide) which is considered by some to be an old Roman road but which looks more like a medieval road. Following the signs we will reach the Salto del Fraile viewpoint and after crossing the same fire-break, we will end the circular route at our original starting point.

1. The Empedraillo track.
2. The Despeñaperros River passing through the Santa Elena station.

Malaga SIERRA DE LAS NIEVES

Expanse 75,000 ha.

Towns El Burgo, Istan, Monda, Parauta, Ronda, Tolox and Yunquera.

1

2

1. Mountaineers in 'Torrecilla'.

2. Tolox and Sierra de las Nieves.

Snowy peaks and deep potholes, which seem to be delving into the plutonic past of these mountains, with their white landscapes and limestone with sheer formations, contrasting with the red-coloured mountains as a result of the periodites that have stained the landscape. The Spanish fir tree provides an intense green colour to the area and the Spanish wild goat can also be spotted and there is a distinct Moorish influence on the villages and the cuisine.

The route CAUCÓN-PEÑON DE LOS ENAMORADOS

Full information
about this route
by scanning this
QR code

Route		Access	A-366.
Length	6.9 km.	Landmark	Puerto de la Perra.
Duration	3 h 15'.	Others	This is one of the most beautiful routes of the Natural Park and it includes three different ecosystems: The pinsapo-fir, the Portuguese high mountain oak and the rupicolous plant community.
Difficulty	Medium-high.		
Towns	Tolox and Yunquera.		

From the Luis Ceballos viewpoint we will walk on the right hand side to a fire-break and down towards La Cañada, through a fir tree forest. At the end of the forest, along a track on the right, we will climb to the Puerto de la Perra, where we can enjoy spectacular views. A small valley amid gall oaks and fir trees takes us to another mountain pass, the Boas pass and from here to the

gall-oak grove of Tolox (here it is compulsory to respect the structures that protect these prized trees that have been greatly affected by human activity). The route from here is practically flat until the Chaparrera pass, where a track left takes us to the Saucillo-Torrecilla Pass.

The last short section takes us to the end of the route, which can already be seen from the road: The Peñon de los Enamorados. From the Peñon de los Enamorados, which marks the end of the route, we can join another route within the Sierra de las Nieves Natural Park, the Saucillo-Torrecilla Mountain Pass route. This route will enable visitors to access one of the highest points of Malaga, the Torrecilla peak, standing at 1,919 metres.

1. The proximity of the majestic Torrecilla is one of the attractions of this route.
2. The fog may appear sometimes along the route.

Malaga MONTES DE MALAGA

Expanse **5,000 ha.**
Towns Casabermeja, Colmenar,
 Malaga.

1

2

At the entrance to the city of Malaga is a gentle mountain repopulated with pine trees. An area marked by numerous streams and rivers in which most of the routes run along their riverbanks and reach the spectacular viewpoints over the Mediterranean. The Arab influence on its villages, the local wines and the silence of the chameleon, are some of the significant features of this natural park. Some recommended stops are the villages of Colmenar and Casabermeja, where the Mediterranean architecture can be enjoyed and their monuments, including the famous Casabermeja cemetery, declared an Artistic-Historical Monument.

1. Gentle hills and farming land form part of the landscape.
2. Colmenar.

 - [Etnological interest]
 - ▲ Elevation meters
- 0 250 500 m

The route starts in the city of Málaga, to the north of the Ciudad Jardín district, just beyond the San Telmo mill, which is accessed via the N-331. 200 metres on, we will reach the border of the Natural Park and the route begins along a gentle climb along a forest track. A kilometre from the start, we will reach the Picapedreros lagar and three kilometres on is a crossing marked by some carob trees.

Here we must take a right towards the Casa de Don Ventura and 500 metres on we take another right. From this point until the end we will not leave the main track, which gently climbs, leading us to the end of the route: at the Casa del Boticario, which is due to become the Montes de Málaga Natural Park Visitor's Centre.

Seville SIERRA NORTE

Expanse 177,500 ha.

Towns Alanis, Almadén de La Plata, Cazalla de La Sierra, Constantina, Guadalcánal, Las Navas de La Concepción, El Pedroso, La Puebla de Los Infantes, El Real de La Jara, San Nicolás del Puerto.

2

3

0 5 10
km

Old and vast pasturelands, dense riverbanks with fresh vegetation, natural surprises such as the Roman mine of Cerro del Hierro, a truly magnificent geological and cultural feature, or the bubbling source of the Huesna River all form part of a park in which town centres like Cazalla, Guadalcánal or Constantina, or the many chapels embedded in wild locations, are all crucial parts of their identity.

PROFILE

The village of El Real de la Jara marks the start and the end of this circular route. The route begins in Calle Santa María and follows a track that leads to the region of Tentudía, in Badajoz. After about 800 metres, it crosses a little stream which, a little further on, flows into the Vibora Stream, which we also have to cross.

We will follow the stream for another kilometre and a half (opening and closing gates to private properties) to the La Lobera stream, which we will follow for another three kilometres until we reach the country estate with the same name. After another 500 metres, we will come across a road where we will turn right and follow this carefully for another kilometre until we reach the Colmenar road, which we will follow until we reach another road. This last road, after a section of 500 metres, will take us to El Real de la Jara along calle de La Paz, marking the end of this route.

1. Vultures in the Sierra Norte.
2. El Real de la Jara Castle.
3. The route, seen from above.

Culture, gastronomy, history... Discovering Andalusia on foot will not be a complete experience unless you get to know its villages and its people. This guide will provide you with a few key elements so you will not miss a thing.

Do not forget

ALMERIA

① The mining town of Rodalquilar

Through out history, the mining resources of Rodalquilar, a small village in the heart of the Cabo de Gata-Níjar Natural Park, seemed to be never-ending. If alum was mined during the Middle Ages, when it was used as the basic element for dyeing fabrics, during the 18th and 19th centuries, lead and silver were obtained until gold was discovered at the end of the 19th century. The gold-bearing mines that can still be seen a kilometre away from the town, closed definitively in 1990. Rodalquilar is also home to a 16th century defensive tower, a fabulous botanical garden, the Cortijo de los Frailes, which is the place in which Federico García Lorca drew inspiration for his work *Bodas de Sangre*.

Pags. 146-147

② A film set

The ideal climate conditions and the quality of its infrastructures have attracted film crews to the province of Almeria since the 1950s. The areas in which a whole host of films have been made are Cabo de Gata and, particularly, the Tabernas desert, which was most popular during the 60s and 70s with its own genre: The spaghetti western. One of the more recent films shot in Almeria was 'Ridley Scott's Exodus', but others include 'El Cid', 'Lawrence of Arabia', 'Patton', 'Conan the Barbarian' o 'Indiana Jones and the Last Crucade'.

Pags. 19-20,
146-147

③ Scuba diving in Cabo de Gata

The Cabo de Gata-Níjar Natural Park is a scuba diver's paradise. This became the first maritime and terrestrial natural park in Andalusia and it is also a Biosphere Reserve, Marine Reserve and Geopark. Covering an area of 12,000 hectares that extends one mile into the sea, it is home to numerous Mediterranean species and vast meadows

Pags. 146-147

1

2

3

of Posidonia Oceanica (commonly known as Neptune Grass). There are a number of professional scuba-diving centres located around the Natural Park, offering scuba-diving courses and all the equipment required to explore the beautiful crystalline waters.

④ La cuajadera de pescado (fish dish)

The province of Almeria is a gastronomic haven, combining the best sea products with fresh products from the vegetable garden and the mountains. A typical dish in the area, particularly on the coast, is the cuajadera, which can be made with any type of large seasonal fish (corvina, sea bass, tuna) combined with potatoes and fresh vegetables.

The particular feature of this casserole is that it is baked in the oven and not in a pot like most other stews from other Spanish regions.

Pags. 19-20

⑤ The “petrified wave” of Monsul

It is almost as if time has suddenly stood still, a giant stone wave juts out over the water at the beach of Monsul, in the heart of the Cabo de Gata-Níjar Natural Park. It is a solidified lava formation situated, incidentally, on what is often nominated as one of the best beaches in Spain, despite only being small - only 300 metres of coastline-.

Pags. 146-147

⑥ Velez-Blanco and Velez-Rubio

Separated only by their “surname” and by approximately two kilometres, the municipalities of Velez-Blanco and Velez-Rubio, within the Natural Park of Sierras de María -Los Velez, apart from their origin, also share the honour of having been declared historic and artistic ensembles. They also have something else in common: The shade of the Maimon Mountain, standing an impressive 1,761 metres tall.

Pags. 150-153

9

10

8

7 Discover el Indalo

Everyone that visits Almeria will sooner or later come across the figure of the Indalo, the symbol of Almeria par excellence and which can be acquired in most local souvenir shops. The origin of the symbol is probably less well-known... It is a magnificent example of Levantine Neolithic rock art, located in the Cueva de los Letreros (Velez-Blanco), declared a World Heritage Site. The figure represents a man holding a rainbow in his hands.

Pags. 19-20,
82-83

Pags. 150-151

8 The almond trees in bloom

The Natural Park of Sierras de María-Los Vélez is home to large plantations of almond trees alternating with olive groves and cereal fields. At the end of winter and towards the start of spring, the almond trees begin

to blossom offering visitors an explosion of colour, when their bare branches fill with beautiful white flowers.

9 La Sierra de los Filabres

The Sierra de los Filabres is the natural extension of the Sierra de Baza, a Natural Park in the province of Granada. The area is particularly famous for the marble quarries of Macael, but you should also visit the Spanish-German observatory of Calar Alto, at 2,168 metres above sea level, on the top of the mountain.

Pags. 19-20,
186-187

Pags. 19-20

10 Hanging houses of Sorbas

The town of Sorbas is located in an area classed as a natural site thanks to its geological formations and the number of caves (more than 1,000 registered caves). Sorbas, bordered by the Aguas River is located half way between other points of interest, such as the Tabernas desert or the Almanzora Valley. The complex orography of the land has meant the popular architecture had to be adapted, resulting in houses that hang off a cliff over the Aguas River.

1

2

3

4

① Vejer

There are not many towns in Spain as picturesque as Vejer. Located on top of a cliff called La Janda, its Arab origins combine beautifully with the subsequent monumental legacy of the Spanish conquest. Just walking through one of the four gates of the old city walls is impressive enough, but the castle (10th century), the Gothic-Mudejar style church, the Casa del Mayorazgo (ancestral home of King Sancho IV) and the Marques del Tamaron palace are all worth a visit. And the sunsets are unparalleled.

Pags. 158-159

② Visit wineries and vineyards

The wine culture reaches a whole new level in Jerez and El Puerto de Santa Maria in Spain. But they are not only internationally known for the quality of their wines, they also offer an immensely valuable and striking architectural heritage. The large wineries, facilities that cover hectares of land and the beautiful country houses situated amid the vineyards that cover the white soils of these lands, will guarantee a wonderful experience associated with the uniqueness of the wines of Jerez in all its forms.

Pags. 154-155

③ Carnival

If anything can bring the whole of Cadiz together, it is its Carnival. Every town celebrates this wonderful pre-Lent street celebration, with carefully designed costumes, requiring great effort, to reflect the comedic tale being told.

Pags. 22-23

④ The wind and surf

A westerly wind or an easterly wind will always be blowing through the Strait of Gibraltar. This is what makes its people so special, which you can only discover by going there and it is also responsible for some incredible wind-shaped trees. But Tarifa is also one of the world's windsurfing capitals. There is an entire local industry designed solely for windsurfers and sports people, where they can enjoy a fun and cosmopolitan atmosphere in this municipality, at the southernmost point of Europe and where they can enjoy the beaches and dunes of Valdevaqueros.

Pags. 158-159, 162-163

⑤ Cetacean route

The Strait of Gibraltar, separating Europe from Africa, is the main route for a num-

Pages. 162-163

ber of Cetacean species. Local companies organise highly recommendable trips in an area that is unique in the world for its landscape alone. Apart from being able to spot pilot whales and dolphins all year round, April to October is the time for sperm whales and July and August is the time for the killer whale. With the two continents only a stone's throw away and with the company of passing ships, the show is guaranteed.

6 Tuna for dinner

The tuna caught using the Almadraba system, is a delicacy of Cadiz revered by the most discerning gastronomic tourists. The giant fish is caught in the labyrinth of nets, called the almadraba, which you can watch if you want to see an incredible show, the fish is then cut into delicious pieces and fi-

nally, once it has been manipulated as little as possible to ensure it maintains its full freshness, we get to taste it, the perfect end to a wonderful day in Andalusia.

7 Cape Trafalgar

CapeTrafalgar, in reality a tombolo, i.e. an island joined to the continent by a narrow strip of land, was witness to the greatest naval battle of its time. In this setting, where the water is always silver-blue, it is easy to imagine the cruelty of the battle that the English engaged in for a number of days in 1805 against the Spanish and the French navies. The beauty of the site and its surrounding areas, with a lighthouse watching over it and inhabited by chameleons, makes it worthy of its classification as a natural monument.

Pages. 158-159

8 Cementerio de Villaluenga del Rosario

A surprise awaits us in this beautiful town nestled in the mountains, the highest of the province and belonging to the Moors for over seven centuries. The magnificent El Salvador Church remains as it was after being burnt down during the war against the French. But inside, under the open sky that acts as the ceiling that was once there and amid its arches and semi-derelict walls, is a white, spontaneous and beautiful cemetery. The setting has a unique beauty, in which heritage, religion and nature come together.

Pages. 170-171

9 Arts and crafts in Ubrique

Visiting this beautiful mountain town, a border area between Arabs and Christians for decades, is a must, as it is famous for its leather products and arts and crafts that flourished during the 18th century, giving extra vitality to the Arab legacy. Half the population in this town is involved in the industry, which we can learn more about in the Ubrique Leather Museum, located in the Convento de Capuchinos. Right next to it are the old tanneries where the leather used to be tanned.

Pages. 170-171

11

10

12

13

⑩ Rome on the beach

There are few beaches as striking as that of Bolonia. The naturalness of it has produced two of its characterising landmarks. The huge dune – 30 metres high and 200 metres wide-, travelling up to the pine forest encouraged by the incessant winds.

Next to this, lying along the beach, are the Roman ruins of the town of Baelo Claudia, an old tuna factory and the origin of the Roman sauce called Garum, now declared a National Historic Monument.

Pages. 66-67

⑪ Eating estuary fish with the salt from the bay

The fish that enter the estuaries and tributaries of the Cadiz Bay from the sea thrive in a unique brackish environment. In some restaurants customers can watch as the gilthead sea bream, White Sea bream, sea bass or sole are caught, guaranteeing the absolute freshness and intense flavour of the fish. Eating fish with the salt obtained from the millenary salt lakes in the area, in particular the fleur de sel, is the perfect way to enjoy this tasty cultural sample in a

Pages. 154-155

setting that enables us to admire the huge variety of bird species.

⑫ Mountain cheeses

The mountainous region of Cadiz produces a variety of top quality cheeses that are gaining popularity and value. Visitors should try a number of varieties. The Payoyo cheese, made from a specific type of goat endemic to Grazalema and which is also offered coated in lard. There are a number of cheeses made with sheep's milk, such as the Pajarete and El Bosqueño. There are also some places where visitors can take part in the cheese-making process.

Pages. 22-23

⑬ Paragliding in Algodonales and El Bosque

For those that enjoy paragliding, Algodonales and El Bosque have various centres where you can practice this sport with perfectly equipped take-off and landing areas. Algodonales is Spain's most international hanggliding spot. This is just one of many active tourism options on offer in the province's parks, together with nautical sports on lakes, canyoning and pot-holing.

Pages. 170-171

CORDOBA

1

3

① The Lagunas del Sur in Cordoba

Right in the middle of the Cordoba countryside is a group of lakes that attract a wide variety of fauna, particularly birds. These are the Wetlands of the South of Cordoba, all of them declared natural reserves: The lakes of Zoñar, El Rincon, Amarga, Tiscar, Salobral and Jarales. With the exception of the Tiscar Lake, which disappears in summer, all the others are permanent. A particular feature of the Salobral Lake, as the name would suggest (Salt) is that it is a saltwater lake, which conditions the fauna and flora in the area. Among other many species, the white-headed duck nests here in winter.

Pags. 26-27

② Gastronomy in Cordoba

The province of Cordoba offers visitors a wide and varied choice of food, characterised by the simplicity of its dishes, the quality of its local products and a notable Moorish influence. Outstanding, well-known dishes such as oxtail, salmorejo (a chilled thick soup) or the flamenquin (serrano ham rolled in pork loin) and of course the migas (sauteed breadcrumbs with bacon), a dish typical of Cordoba and normally served with orange. Visitors should also try the local products certified with designation of origin:

Pags. 26-27

2

2

The variety of sherry wines, amontillados, olorosos and Pedro Ximenez from the Montilla-Moriles region; the Iberian ham from the Valle de los Pedroches; or the excellent oils from Baena or Priego de Cordoba.

③ Guadalquivir's bend into Montoro

Like a miniature Toledo, Montoro looks over the meandering Guadalquivir River catalogued as a Natural Monument giving the municipality a unique beauty. Montoro, the gateway to the Natural Park of the same name, close to Cardeña, has so much to offer visitors, such as the Plaza Mayor, la Casa de las Tercias or its historic quarters, declared a Place of Cultural Interest.

Pags. 182-183

5

8

6

7

④ The community of San Calixto

On the edge of the Bembezar River, nestled in the mountains of the Natural Park of Sierra de Hornachuelas, is the small community of San Calixto, established in the 16th century. The isolation and tranquillity of this mountain area made it the ideal place to build a monastery of Discalced (barefoot) Carmelites, who now offer their arts and crafts to visitors.

Pages. 178-179

⑤ Cordoba Castles

Only a few kilometres from Cordoba city centre, situated on the top of a rock to the right of the Guadalquivir, is the Floresta Castle in Almodovar del Rio, watching over the region with its solid stone walls and its eight quadrangular towers. It is one of the best preserved castles of the province and, although it is privately owned, it can still be visited, but it is not the only one. Other towns in the province also have strongholds that

Pages. 26-27

bear witness to a rich historical past, such as Belmez, Belalcazar, Montemayor, Luque...

⑥ Guadalquivir Mills

When the Guadalquivir reaches Cordoba it settles down and flows slowly and discreetly. Along its banks are a dozen mills that simply have to be visited. Now that we are so close to the Calahorra Tower and the Mosque, a visit to Cordoba's city centre is an absolute must.

Pages. 26-27

⑦ The pasturelands of the north

If there is one thing that characterises the north of the province of Cordoba it is the large number of hunting grounds and the excellent conservation of its holm oak forests, located in the regions of the Guadiato Valley and, above all, in the Los Pedroches Valley. They are mainly used for raising the Iberian pig in order to produce the hams with designation of origin of Los Pedroches and a large number of cold cuts and cured meats. The holm oak forests have shaped a lifestyle based on cattle breeding which is even reflected in the architecture typical of the area.

Pages. 178-179, 182-183

⑧ Zuheros

The small village of Zuheros on the Sub-Baetic mountain range, is one of the most beautiful in Andalusia, perched on a large rocky outcrop dominated by an Arab castle. The uppermost part is where the entrance to the

Pages. 174-175

9

Murciélagos Cave is located, a Neolithic site that possesses some of the best rock art in Andalusia, as well as stone implements, burials and even food remains. Zuheros is also famous for its goat's cheese, so much so that, every year, during the month of September, a festival is held in honour of this product.

9 Fountains and gardens in Priego de Córdoba

The municipality of Priego Cordoba, located on the Sub-Baetic mountain range, is home to over thirty properties of cultural interest. Its beautiful historical quarters are full of gorgeous gardens and springs such as the Fuente del Rey or the Fuente de la

Pags. 174-175

11

Salud. The Balcon del Adarve offers spectacular views of the olive groves in the region and the nearby Sub-Baetic mountains. Right next to it is the Barrio de la Villa, with its quiet streets with houses decorated with flowers dating back to Moorish times.

10 The dance of the lunatics

Fuente Carreteros, a hamlet of Fuente Palmera near to the Natural Park of Sierra de Hornachuelos, holds the traditional "Danza de los Locos" (The dance of the lunatics) on the 28 December each year (Spain's equivalent to April Fool's Day), the exact origins of which are still unknown. Dressed in traditional costumes, six "lunatics" and a "little lunatic", cross over in a dance that represents the killing of children ordered by King Herod during the 1st century of our era.

Pages. 178-179

11 The bellowing

At the beginning of autumn, the hills of Cordoba, considered to be the best hunting grounds in Spain, turn into a natural sonorous festival. It is the bellowing of deer during the rutting season, when the males emit guttural sounds and fight among each other to mate with the females. Today, this unusual scene is another tourist attraction that can be seen in a number of natural areas such as the Sierra de Hornachuelos.

Pages. 26-27

GRANADA

① Staying in a cave house

In the regions of Guadix and Marquesado and the high plateaus of Baza and Huescar there is tradition that is as old as the human species: living in caves. The once humble homes of families are today a popular and unique tourist attraction, with accommodation offering all the modern commodities and in such truly inviting areas as that offered by the monumental city of Baza. The slim chimneys that emerge from underground and the whitewashed entrances let us know they are there.

Pags. 186-187, 194-195

1

2

3

4

② Granada

Many of the proposed routes go so near to Granada that visitors really should take some time to discover one of the most beautiful cities in the world.

Just visiting the Alhambra is reason enough to justify a trip to Granada, but the city itself is fully of charm and beauty. The unforgettable views of Sierra Nevada do the rest.

Pags. 30-33

③ The Roman-Iberian city of Basti

About three kilometres from Baza was its original location, the Roman-Iberian city of Basti, one of the main Iberian fortified cities in Spain, to the point that it is what gave its name to this vast region, the Bastetania, which included the current eastern side of Andalusia. Possibly established around the 8th or 9th century, it was also occupied by visigoths and byzantines. The famous Lady of Baza, discovered in Basti, is the finest example of Iberian art.

Pags. 186-187

④ Jarapas with a history

The old spinning and textile tradition of La Alpujarra began with silk during the Arab era, but continued with the workshops where the Moors made rugs. That is, throws or rugs made from rags, scraps of cloth. The craft continues and this bright and colourful apparel with different textures is an attractive and very representative product of La Alpujarra and the intense history of this region.

Pags. 142-143

⑤ Trout fishing in the Castril River

The Castril is a beautiful, clean river that emerges from a stony wall and offers the opportunity to fish in its pure trout-filled waters. This river is a favourite among the fishermen of Granada and also among otters. The surroundings during the journey to the Lezar bridge, where the trout fishing area is located, is simply marvellous, with cliffs (La Osa) and caves (Don Fernando), which should be visited, along with the town centre of Castril, declared a Historic-Artistic Site.

Pags. 190-191

5

⑥ Jose Saramago Cultural Centre

Jose Saramago Nobel prize in Literature, acquired a powerful relationship with Castril, his wife's hometown and he himself was named adoptive son of the village. The Jose Saramago Cultural Centre organises conferences, exhibitions, courses, tours and also recovers the tangible and intangible heritage. A visit to this Centre will enable us to get to know the region and the writer a little better.

Pags. 190-191

8

9

⑦ The Alquife mines

The mines have been declared a Place of Cultural Interest for their historical, geological, aesthetic and ethnological values. If the main producer of iron during the Nasrid era in Al-Andalus was Alquife, during the 19th and 20th centuries it was Spain. Some of the striking features of the landscape are an enormous crater with a 130 m deep lake, the sterile mountains or the enormous reservoir that stored water for the mining community.

Pags. 30-31

7

⑧ Try the typical dish of the Alpujarras and bread from Alfacar

Mountain cuisine is very honest. Starter dough, spring water and hands with centuries of experience, make the bread from Alfacar -roscos, roscas, bollos and hogazas- the best in the country, with their own Protected Geographical Indication. A tradition that began in the 16th century. The bread in the beautiful Alpujarra region, together with

Pags. 142-143

other local raw materials, is the basis of a filling, yet delicious Alpujarran dish.

⑨ Spanish Wild Goat

Granada is home to one of the largest colonies of this spectacular animal and it can be spotted from Sierra Nevada to the rugged coastal areas of Maro-Cerro Gordo. Its daytime behaviour, often living in close proximity to humans, allows us to admire the incredible ability of walking up vertical walls.

Pags. 142-143

10

⑩ Skiing

Europe's southern most ski resort is Sierra Nevada, bordering with the national park. Its comprehensive selection of sports facilities even includes night-skiing on a lit-up piste. As it is located next to a protected area, regulations have to be adhered to, allowing everyone to enjoy unique plant species and the highest landscapes of the peninsula.

Pages. 142-143

11

12 13

The Cabra road, a 60 km winding road that is now enjoyed by cyclists, motorcyclists and those that love landscapes and ventas of yesteryear.

It starts at the Suspiro del Moro, and runs through the Sierras of Tejeda, Almijara and Alhama, it passes the union of the Verde and Seco Rivers and runs through the beautiful villages of Otivar and Fornes, to end on the Almuñecar coast. Here visitors can enjoy Maro-Cerro Gordo, idyllic beaches with the extraordinary marine life.

Pages. 30-33

⑪ Ham from Trevelez

One of the highest town in Spain (1,480 m) produces a unique ham, with specific characteristics such as its low salt content, which was even recognised by Queen Elizabeth II in 1862. This ham is the perfect partner for the wines of Granada, offering a wide selection of quality red and white wines and even cava. All the vineyards are located at a considerable height and produce varied wines with many shades and nuances.

Pages. 142-143

⑫ The cabra road

For many decades there was only one route down from Granada to the Costa Tropical:

⑬ Tropicales fruits

The unique subtropical climate of the coast between Granada and Malaga has enabled tropical fruits to be cultivated, which are then sold throughout Europe. Particularly mangos, avocados, papaya, cane sugar and custard apples. Eating them when they have reached their ideal level of ripeness, which is not always possible outside the production areas, is what makes them so appetising.

Pages. 30-31

① Prawn and 'coquinas'

Pags. 34-35

The sea products of Huelva, particularly the shellfish have made it famous worldwide together with the quality of its gastronomy. The prawn from Huelva, paler in colour than others and the striped king prawn from the Guadalquivir estuary, commonly known as the tiger prawn, are its star products. The city's fleet, Isla Cristina and Ayamonte, deliver an extraordinary quality of fish to the market, which marks the end of a restless day.

② Tartessos and the Atlantis

Pags. 138-139

Two of the great European legends are based in Huelva. The mythical Atlantis, the only news of which is from Plato's work, is still sought today amid the mountains and marshlands of Doñana. However there is nothing mythical about the Tartessian civilization, although the exact location of its capital still remains a mystery. Some experts claim that these remains are also submerged beneath Doñana. In any event, these are two more reasons to go on this route or to visit the city's museum.

③ The ham culture

Pags. 202-203

Iberian ham from free-range pigs raised on the pasturelands, is Spain's most international delicacy. The epicentre is located in Sierra de Aracena, where the artisan industry offers visitors the very best products. The characteristic smell of some towns such as Cumbres Mayores or Jabugo, is the result of the ham driers, where the pork leg is dried in the open air of the mountain range. The best way to purchase a leg of ham is in situ and advised by an expert.

④ The fossil dune of Asperillo

Between Matalascañas and Mazagon, along 25 km, is the Asperillo cliff, an unusual escarpment which is in fact a fossil dune. Reaching one hundred metres in height along some points, this natural monument has an array of colours - orange, white, ochre and black- as it is actually sedimented sand which the sea and the wind have converted into these whimsical shapes. A stroll along the beach or along the cliff, will allow you to enjoy the area, which is home to the lynx and to turtles.

Pags. 72-73

5

7

8

⑤ Almonaster Mosque

Almonaster la Real offers visitors the chance to visit an old mosque (10th century, declared a National Monument) which was built on the remains of a Visigoth church and subsequently a Catholic chapel. Much of history can be summarised by visiting the magnificent castle. Almonaster is also a village with an immaculate location, in which Gothic elements mix with Renaissance or Mudejar styles and there is also a Roman bridge dating back to the 1st century.

Pags. 202-203

⑥ La romería de la Reina de los Angeles

The areas great pilgrimage festival is held in September in Alajar. An imposing rock overlooks this incredible village, watching over most of the region and which also houses the Virgen chapel, built during the 15th century. A number of brotherhoods from the region arrive after a few days of concerts, meals and partying in Alajar, to join the procession along the Arias Montano rock, named after the humanist who retired there to study.

Pags. 52-53

⑦ Eat wild mushrooms

The Sierra de Aracena offers the widest selection of wild mushrooms and truffles in Andalusia. Its characteristic heavy rainfall and clayey soil is ideal for the more than 500 varieties of this wonderful fruit of the earth to grow from autumn to spring. Perhaps the most highly regarded is the *Amanita ponderosa*, which can be found nearer to spring. Every restaurant in the area offers this dish, normally served with scrambled eggs and Iberian ham, an absolute delight for hikers.

Pags. 202-203

⑧ The Rocio

This is the largest pilgrimage in Spain, unquestionably linked to Doñana. It was in this forest, legend will have it, that the image of the Virgen del Rocío appeared and hundreds of brotherhoods trek through this natural area in June. The hamlet of El Rocío, the home of the temple, is located in an exceptional setting, the Rocina stream, a shallow water tributary that offers the perfect habitat for a multitude of bird species,

Pags. 138-139

and it is equipped with observatories and a visitor's centre.

9 The town centres of the sierra

There are 14 towns in this area that have been lucky enough to be catalogued as Places of Cultural Interest (Alajar, Almonaster, Aracena, Aroche, Castaño del Robledo, Corteconcepcion, Cortelazor, Fuenteheridos, Galaroza, Higuera de la Sierra, Linares de la Sierra, Los Marines, Valdelarco and Zufre). This extraordinary wealth translates into stoned streets, whitewashed walls, Arab tiles, wooden carpentry... in other

Pags. 202-203

words, a beauty that adds to the harmonious and colourful natural surroundings.

10 Discovery of America

Among the internationally famous elements of Huelva is without doubt, the fact that it was the starting point of Columbus' first voyage to America. The Rabida monastery, where the famous journey was prepared, is a magnificent building run by Franciscan friars. The Carabelas Museum is also located in Palos, where the perfect replicas of the Spanish ships the Pinta, Niña and Santa María can be seen, as well

Pags. 34-35

as other items that help us to understand the background and importance of these journeys.

11 Juan Ramon Jimenez

Huelva and Seville have produced some of the best poets in Spain, two of whom received the Nobel prize. One of these is the native of Moguer, Juan Ramon Jimenez, who, in his precious work sublimely describes the region of Doñana where he was brought up. In Moguer his home has been converted into a museum, another reason to visit the town centre, which also

Pags. 138-139

12 The Gruta de las Maravillas

In Aracena is the first underground cave opened to the public in Spain (1914), which is 1.2 kilometres long.

The Gruta de las Maravillas is located just below the magnificent castle and it is particularly striking because of its stalactites, stalagmites, flowstones, curtains, gours, together with the lakes, the vastness of the areas and the colour of the stone.

Pags. 58-59

4

3

① The Organs of Despeñaperros

It is worth stopping at the viewpoint located near the Natural Monument of Los Organos de Despeñaperros, in the heart of the Natural Park with the same name. This is a group of giant rock columns, several hundred metres high, that look like the tubes of an organ. At the top is a wonderful Mediterranean forest with holm oaks, cork trees and scrubland full of fauna that have found their ideal habitat here.

Pags. 218-219

② Las Navas de Tolosa

Of all the relevant events throughout the history of Spain, the battle of Navas de Tolosa is among the most important. This hamlet of La Carolina witnessed a battle in 1212 between the Arab and Christian armies that led to the culminating point of the Reconquest and opened the gateway to the Valle del Guadalquivir in subsequent decades. There is a museum in Navas de Tolosa, situated exactly where the battle took place and which helps visitors to understand the implications of such a historic event.

Pags. 218-219

③ Lynx in their natural habitat

Being able to watch one of the most endangered feline species in the world in its natural habitat, the Iberian lynx, is a privilege that can be enjoyed in the province of Jaen. Although difficult to spot, a number of active and nature tourism companies of Andujar know their transitory and grazing areas, which means we stand a much greater chance of spotting them. You must take a camera and binoculars and good deal of presence if, finally the lynx does appear before us. If it does appear, the beauty of this unique animal will be the highlight of our journey.

Pags. 210-211

④ Romería de la Virgen de la Cabeza

At the end of April, the town of Andujar holds one of the most important pilgrimage festivals in Spain, in honour of the Virgen de la Cabeza. The ceremony takes place in the Santuario de la Imagen, in the heart of the Sierra Morena of Jaen, and in which thousands of pilgrims take part. The temple dates back to the 13th century, although it

Pags. 76-77

has been reconstructed and extended over time. It had to be rebuilt after the Civil War when it was destroyed during the assault by republican troops.

Pags. 38-39

5 Baños de la Encina

Half way between the foothills of Sierra Morena and the olive groves of the Jaen countryside, is the little village of Baños de la Encina, a historic settlement in which both the Christians and the Moors left their mark. It is imperative to visit the Arab castle of Bury Al-Hammam (or Burgalimar), built in the middle of the 10th century, the original layout of which still remains almost in its entirety since the Christians barely changed the building after the Reconquest.

Pags. 210-211

6 Puntal de los Cuatro Terminos

The views from the top of the Puntal de los Cuatro Terminos, located in the heart of the Sierra de Andújar Natural Park, extend various kilometres around, covering four municipalities and two autonomous communities: Andújar, Baños de la Encina and Villanueva de la Reina in Jaén and Mestanza en Ciudad Real (Castilla La Mancha). A 4 km signposted route takes us to the top along a cattle track, close to the hamlet of El Centenillo (18 kilometres from La Carolina).

Pags. 90-91,
206-207

7 Sources of the Guadalquivir and the Segura

The two large rivers of the South, the Guadalquivir and the Segura, begin in the natural park of Cazorla, Segura y las Villas. The two are very different and both should be visited. In the small valley of Las Fuentes, a modest and hidden area, the large Arab river timidly emerges from a bare rock, but soon its clean waters begin the long journey to the sea amid large stones and riverside vegetation. Dozens of kilometres away, the Segura emerges from the ground in a large turquoise pool near the little village of Fuente Segura.

Pags. 214-215

8 Jodar Castle

The Jodar Castle, which also houses the Visitor's Centre of the Sierra Magina Natural

5

7

8

9

11

10

Park, was built at some point during the Iberian era, although the first documents date it to the 9th century, which would make it the oldest in Andalusia. It has two towers, a Christian one and an Arab one, although most of its walls and fortress walls have disappeared over time.

⑨ The gastronomy

Pages. 38-39

The gastronomy of Jaen has its own distinguishing features (apart from its oil) such as its game from the hunting grounds, lamb from Segura (made with a spice adapted to

the lifestyle conditions of the Sierra de Segura), wild mushrooms, potato migas, or the gachamiga.

⑩ Olive oil

Undoubtedly olive oil is the star product of Jaen, which has the largest area dedicated to olive groves in Spain. There are currently three protected designations of origin for olive oil in Jaen: Sierra Magina, Sierra de Segura and Sierra de Cazorla, and other producing regions such as la Campiña or la Sierra Sur. The most important olive variety in Jaen is the picual, which represents 95% of the production.

Pages. 38-39

⑪ Hundred year old yews in Cazorla

One of the most representative trees of Cazorla, although not the most common, is the yew, an evergreen conifer that can be seen along a short route that starts at the Cañada de las Fuentes ravine near to the source of the Guadalquivir. These trees are between 100 and 200 years of age, but at least one of them, with a seven metre wide tree trunk, is estimated to be around 1,000 years old.

Pages. 206-207

MALAGA

① Listen to verdiales

Pags. 226-227

Verdiales is a specific singing style and culture that can only be heard in some regions of Malaga, such as Axarquia, Valle del Guadalhorce and the surrounding areas of the Montes de Malaga Natural Park. The groups of singers gather at festive events to show off this style of singing similar to the fandango in flamenco, but accompanied by violins, cymbals, castanets, tambourines, guitars and lutes or bandurrias.

② Visit the white villages

Pags. 166-167, 222-223

The white villages of Andalusia, mainly those of the provinces of Cadiz and Malaga, form one of the most beautiful architectural routes of the region. Perched on the last mountain foothills of the Baetic system, these villages impress visitors with the contrasting colours of their bright white-washed walls and the beautiful flowers that normally decorate the streets, patios and balconies. These villages were created on the border between the Christian and Arab kingdoms, the presence of which is still evident in the network of little streets and steep slopes.

③ See the Picasso Museum in Malaga

Pags. 42-43

Situated in the heart of the city, the Picasso Museum is located in the Buenavista Palace, (16th century), a fine example of Andalusian architecture that combines Renaissance and Mudéjar elements, to the point that the building itself is a work of art. The Museum has a permanent collection that includes 233 works of art by the Malaga artist, as well as another 43 works of art on loan by the artist's family for 15 years, created over eight decades, between 1892 and 1972.

1

3

2

④ The Sima GESM

The Sierra de las Nieves Natural Park is unique for its geological features. This site has some extremely unusual formations rarely seen in other places: Steep cliffs, limestone pavements, sinks, sink-holes, karst fields... But without a doubt, the greatest treasure of the Natural Park is the Sima GESM, one of the deepest in the world at 1,100 metres .

Pags. 94-95

5

6

8

5 The Desfiladero de los Gaitanes

The Caminito del Rey is an engineering project built at the beginning of the 20th century to join the two reservoirs via the shortest route, through the Desfiladero de los Gaitanes. It is a three kilometre long path suspended 100 metres off the ground, running between enormous vertical walls. It has recently reopened to the public and booking is required in order to visit this tourist attraction with spectacular views of the Desfiladero de los Gaitanes from various points, such as the Alora station.

Pags. 126-127

6 Ronda

Ronda is undoubtedly one of the most beautiful towns in Andalusia and definitely worth a visit. Although there are a number of pre-roman and roman remains, its most splendorous era came with the Nasrid kingdom of Granada, when the town became the strategic border point with the Kingdoms of Castille. Two monuments in Ronda not to be missed date back to the 18th century: The

Pags. 222-223

bullring, considered to be one of the oldest in Spain and the Puente Nuevo, a majestic bridge over a 100 metre deep gorge.

7 'El Paso'

Several towns in the interior of the province of Malaga, as Istán, Riogordo or Cajiz, celebrated every year during Easter a tradition known as El Paso, which represents various scenes from the New Testament and which includes the Crucifixion of Jesus. Are declared celebrations of tourist interest.

8 El Torcal de Antequera

The Natural Site of El Torcal de Antequera offers visitors a whole host of activities to discover its unique geological formations, with more than 1,000 caves and registered chasms and where they can admire the huge number of ammonites, fossils of marine origin formed 200 million years ago. There are also a number of archaeological sites in El Torcal that bear witness to the presence of humans since the Mid Neolithic Period.

Pags. 54-55

9

10

⑨ The Smurf village

They are only fictional, created by humans, but they have their own village and that is real. The smurfs, those friendly little characters enjoyed by children for generations, live in Juzcar, the village located on a cliff in the Serranía de Ronda. In 2011 the film, *The Smurfs*, made its debut in this town and since then the houses remain a vivid shade of blue.

Pags. 42-43

11

⑩ Gastronomy of Malaga

Malaga has a number of coastal, mountain and inland meadow regions and this is reflected in its gastronomy, which includes meat and fish dishes and even typical vegetable dishes and delicious desserts. For example the porra antequerana, the ajoblanco, the fish gazpachuelo, oxtail from Ronda... Malaga of course is famous for its fish, such as the fritura malagueña, or its sardine skewers that can be enjoyed on the beach.

Pags. 42-43

⑪ Nerja Caves

Discovered in 1959, the Nerja Caves are one of the most exceptional geological and archaeological sites in Spain. A large number of its halls and galleries, full of stalactites and stalagmites, are accessible to the general public; however, the almost 600 rock art motifs, considered to be Man's first artistic expressions cannot be visited for conservation purposes. The Nerja Caves are a Historic and Artistic Monument and a Place of Cultural Interest .

Pags. 42-43

① The Cartuja de Cazalla

The endless spring located on this elevated site was vital for the original inhabitants, first the Arabs during the 8th century and the Hieronymite monks in the 15th and finally the Carthusians. This National Monument still maintains its hostelry tradition and today provides accommodation for travellers in an idyllic setting, where exhibitions and concerts are organised but always with the silence and the views as the main point of reference. It is located very close to the town of Cazalla, which together with Guadalcánal and Constantina, are the most monumental and well preserved of the Sierra Norte Natural Park.

1

2

3

4

② The city of the emperors

Trajan from Seville, first emperor not born in Rome, and his successor and nephew Adrian, who took Rome to its maximum level, were both born in Italica. The equally mythical Escipion founded this Roman city after defeating the Carthaginians in the nearby town of Alcalá.

Today, the Archaeological Ensemble of Italica offers visitors a marvellous Roman amphitheatre and the possibility of retracing what were its streets and the opportunity to discover the houses, public buildings, works of art and everyday tools used by its

Pags. 106-107

inhabitants. All of this together with the San Isidoro del Campo, form an incredible view of the past.

③ The river mountain

On the immense plain of the Bajo Guadalquivir, an elevation a couple of metres high already stands out and it continues for more than 29 kilometres. This is why it is known as the River Mountain among the locals. This artificial elevation allows us to cover the route between the nature reserve of Dehesa de Abajo, a haven for birds with its lake and a spectacular colony of storks in the wild olive tree groves and the border of

Pags. 64-65

the Doñana National Park. During the route we can see the virgin marshlands and those planted with rice, both brimming with bird species.

④ Homemade liquor and wines from the sierra

Even Cervantes cited the wines of Alánis, Cazalla and Guadalcánal, the vines of which enabled the spirit to be taken to America. After the devastating phylloxera plague, the vines were planted again in the region, but its most famous liquor is the homemade cherry liquor. The enormous amount of grapes produced

Pags. 230-231

was what led to the distillation of part of the fruit, which is how the anisette is also obtained. These drinks are still being produced using the traditional methods in Cazalla and in Constantina and what better way to end a meal consisting of game dish.

5 Via verde

The old train route that used to take mineral from the Cerro del Hierro to Seville is now a green route for walks and cycle tourism along the route from the mine to the Cazalla train station. Along 18 km, suitable for the entire family as it has a low level of difficulty, the route covers the mostly relevant points of the natural park, with particular focus on the riparian forest of Huesna, and the source of the Huesna. Local companies offer complete services, although you can take your own bikes on the train from Seville. There are a number of picnic areas and restaurants along the way.

Pags. 230-231

6 River crab

The ever-present crab will accompany us on our visit to the Doñana marshland, a crustacean that arrived in the 1970s. The American river crab has adapted to these wetlands to the point that it now forms part of the diet of the amazing bird life in the natural and national park. And also of the residents in the region. A number of companies revolve around the crab fishing and canning industry. All the restaurants of Isla Mayor y La Puebla del Rio offer river crab dishes.

Pags. 138-139

7 Rivera del Huesna

The Huesna irrigates a large part of the natural park of the Sierra Norte from its source in a very accessible area of San Nicolas. The initial routes begins in a gallery forest where there are recreational areas, such as Isla Margarita or the Molino del Corcho, campsites and we can also spot trout, otters and the common kingfisher, among other many species. This deciduous forest with changing colours is made up of holm oaks and cork oaks, together with the Pyrenean Oak, the most unique tree in the park.

Pags. 230-231

8

9

11

⑧ Meat and cold cuts

Hunting is hugely popular in the Sierra Norte which is reflected in a large number of typical dishes based on venison, wild boar, partridge, hare and rabbit. Of course, the Iberian ham and the chorizos or blood sausage, from the Iberian pigs raised on the pasturelands eating acorns, should form part of any traveller's menu in order to understand the culture of the region. All the towns offer their own pork products and of course, they consider theirs to be the best! In the southern area of Seville, in the marshlands, meat connoisseurs can enjoy the exclusive meat from the mostrenca cow or marsh cow.

Pags. 230-231

⑨ Mosto (a kind of grape juice) and olives from Aljarafe

There is no better way to get a sense of the deep-rooted Roman and Arabic past of the region of Aljarafe, situated 100 metres high in the Guadalquivir Valley than through two of its most famous products, mosto and olives. The wine from the fermented grape is popular in winter, with a toast to the cultures passed down and a panoramic view of the olive groves, vineyards, large country estates and riverbanks that make this area so special. Table olives are one of the specialities of the gastronomy in Seville.

Pags. 46-47

⑩ Romería del Robledo

The busiest pilgrimage of the Sierra Norte has been held in Constantina since the 16th century. In August the Virgen del Robledo is taken to the village; and in September she returns to a chapel located 5 km from that village, accompanied by various celebrations. This is a good opportunity to also visit the town centre, declared a Place of Cultural Interest. The streets around the castle, of Arabic origin, located in the areas of Cuestas and La Moreria still retain the traces of their Moorish past. There are also a number of chapels, churches and stately houses that make the stroll very interesting.

Pags. 230-231

⑪ Rice and duck

Seville is the largest producer of rice in Europe. Thousands of hectares of rice fields were planted during the 1950s, making the surrounding area of Doñana a powerful agricultural landscape, very popular among protected bird species. Of course, there are a number of rice-based dishes that are extremely popular among visitors in this area. The exquisite paellas prepared by restaurants and individuals alike are justifiably famous. Or rice with duck – anserinae- hunted in the surrounding areas of Doñana. A considerable number of families from Valencia settled in this area as tenant farmers, bringing their experience and know-how to the area.
